

 **Aquatrols**<sup>®</sup>

1 litre • 10 litres

## A treatment specifically designed to provide rapid recovery from existing water management problems such as dry patch.

### Dilution rate:

1 litre:20 litres water

### Application rate:

25 litres/hectare

### Follow up rate:

12.5 litres/hectare

A treatment surfactant formulation designed specifically to provide rapid recovery from existing problems such as localized dry spot. Aqueduct can also be used as a pre-treatment tool to correct problem areas before starting a regular preventative program.

Aqueduct moves water deeply into problem areas, reducing water repellency and restoring the rootzone's ability to regain optimum moisture levels. Aqueduct quickly reduces turf wilt and promotes recovery of stressed turf.

Because Aqueduct works rapidly to correct localized dry spots and other water movement issues, it's a quick and economical solution to problem areas course wide.

It's the perfect match for areas such as mounds, slopes and bunker faces that are unable to absorb water. Aqueduct helps water move more evenly into these traditionally dry areas, making sure turf gets the water it needs to stay alive and play well.

## Benefits

---

- Treatment
- Designed specifically to provide rapid recovery from existing water management problems
- Reduces water repellency quickly
- Can be used as a pre-treatment
- Moves water deeply into problem areas
- Doesn't have to be watered in immediately after application
- Increases moisture
- Improves turfgrass quality
- Safe for use on all turf types
- Cost-effective
