

A unique blue water soluble spray dye designed to highlight sprayed areas, therefore reducing sprayer overlap of missed areas.

- 1** Mix 100 - 250ml per 100Ltr of Spray solution.
- 2** Amount added to the spray will vary with the product you are applying. Seaweeds will need more dye added and wetting agents will need less.
- 3** Each operator sees the strength and colour differently, Some people see one colour better than another, so this dye is available in Blue and Green.
- 4** Clean spray tank after application with an approver cleaner such as Prestige Super Tank Cleaner.
