

COLLIER[®] TURF CARE

*The Turf Care
Specialists*

2017 / 18 Product Guide

East Anglia's Leading Supplier and Advisor to the Sports and Amenity Trade.
Supplying East Anglia, the South East, the South and the Midlands.

www.collier-turf-care.co.uk

COLLIER® TURF CARE

Collier Head Office, Drury Square, Beeston, King's Lynn, Norfolk, PE32 2NA

Mission Statement: "Collier Turf Care aims to provide excellent customer service to all its clients, setting the highest benchmark within our industry sector."

Welcome to Our 2017/18 Product Guide

Our 2017/18 catalogue contains the most comprehensive range of branded manufacturer products and our unique own brand Prestige range. If the product you require is not featured in this catalogue please ask and we will try to source it.

Technical Staff

Our technical sales representatives are fully BASIS and FACTS qualified to advise our customers on the management and maintenance of turf. Regular technical training keeps them abreast of the latest products and how they should be used to maximise their benefit to you our customers.

Turf Products

Fertilizers, chemicals, grass seed, turf, soils and top dressings, equipment, wetting agents, soil conditioners, seaweeds and biological products. We supply the most comprehensive range available from our own warehouse. Full safety data sheets are available on all products that require them by accessing our website www.collier-turf-care.co.uk, where you can download them at your convenience.

Sports Equipment

Available from Collier Sports, a division of Collier Turf Care, the full range of Harrods sports equipment is available by going on our website.

Contract Spraying

Using specialist NROSO registered contractors we are able to offer standard or covered boom spraying for weeds, pests, fertilizers and worm control. We are able to offer everything from knapsacks, quad bikes, four wheel drive specialist machinery and shrouded boom sprayers.

Soil Analysis Service

Achieving the right balance of nutrients in the soil is an essential for assisting in the establishment and successful management of high quality turf. We can provide standard soil sample analysis, or other more comprehensive tests as required by our customers.

Pricing Policy

Worldwide costs such as oil, gas, raw materials and currency changes effect pricing on our products. We will do anything within our power to keep prices as realistic as possible.

Trading Area

Collier Turf Care is a privately owned company with over 40 years experience as a supplier to the amenity and sports turf customers. Originally covering just Norfolk and Suffolk and following a very successful management buyout in 1998 the business has gone from strength to strength. We now cover the whole of East Anglia, the South East, the South and the Midlands all supplied from our modern BASIS registered warehouse in Norfolk.

BAR FESCUE

THE TOP RATED 100% RED FESCUE BLEND FOR GOLF COURSES

GREENS, TEES, FAIRWAYS AND
BOWLING GREENS

Quality in the yellow bag.
Find out more about how and
why this mixture works so well.

Barenbrug Bar Range Grass Seed Mixtures

Barenbrug's 2017 cultivars have again achieved the top ratings in this year's Turfgrass Seed Guide and this demonstrates yet again their breeding, research and development pedigree.

Fine Turf

Bar 1

Renovation of golf and bowling greens, combining performance with economy for limited budgets.

40%	Barpearl	slender creeping red fescue
40%	Barswing	chewings fescue
20%	Heriot	browntop bent
Sowing rate: 20 - 30 g per sq.m		Sowing depth: Rootzone contact
Over sowing rate: 10 - 20 g		Min. cutting height: 4 mm

per 20 kg

Bar 2

Excellent shoot density for construction and renovation of golf, bowling and putting greens.

20%	Viktorka	slender creeping red fescue
20%	Barcrown	slender creeping red fescue
20%	Barlineus	chewings fescue
20%	Bargreen II	chewings fescue
10%	Barking	browntop bent
10%	Manor	browntop bent
Sowing rate: 20 - 30 g per sq.m		Sowing depth: Rootzone contact
Over sowing rate: 10 - 20 g		Min. cutting height: 4 mm

per 5 kg
per 20 kg

Bar 22

Greens, tees and fairways where it enhances drought tolerance, winter colour and performance in low nutrient environments.

40%	Barpearl	slender creeping red fescue
40%	Barlineus	chewings fescue
20%	Beacon	hard fescue

Sowing rate: 25 - 35 g per sq.m Sowing depth: 8 - 12 mm
Over sowing rate: 15 - 25 g Min. cutting height: 5 mm

per 20 kg

Bar All Bent

Construction, renovation and species exchange for golf and bowling greens. Excellent performance in both summer and winter growing climates.

50%	Heriot	browntop bent
40%	Manor	browntop bent
10%	Barking	browntop bent

Sowing rate: 8 - 10 g per sq.m Sowing depth: rootzone contact
Over sowing rate: 4 - 6 g Min. cutting height: 3 mm

per 10 kg

per 20 kg

Bar Fescue

Construction, renovation and species exchange for free draining golf and bowling greens.

30%	Viktorka	slender creeping red fescue
30%	Bargreen II	chewings fescue
20%	Barlineus	chewings fescue
20%	Barcrown	slender creeping red fescue

Sowing rate: 25 - 35 g per sq.m Sowing depth: 8 - 12 mm
Over sowing rate: 15 - 25 g Min. cutting height: 4 mm

per 20 kg

Bar Trio

Has been specially designed to offer superior salt tolerance for links and coastal courses on greens, tees and fairways.

40%	Barpearl	slender creeping red fescue
30%	Viktorka	slender creeping red fescue
30%	Barmalia	slender creeping red fescue

Sowing rate: 35 - 45 g per sq.m Sowing depth: 8 - 12 mm
Over sowing rate: 20 - 30 g Min. cutting height: 4 mm

per 20 kg

Medium Fine Turf

Bar 6

Construction and renovation of golf tees, fairways and driving ranges, plus cricket outfields and hardwearing lawns.

35%	Sergei	strong creeping red fescue
30%	Sirtaky	dwarf perennial ryegrass
15%	Barswing	chewings fescue
15%	Barpearl	slender creeping red fescue
5%	Highland	browntop bent

Sowing rate: 25 - 35 g per sq.m Sowing depth: 5 - 10 mm
Over sowing rate: 10 - 20 g Min. cutting height: 4 mm

per 5 kg

per 20 kg

Bar 20 Fairway

New mixture giving fast establishment, excellent density and superior drought tolerance for renovation and construction of well-drained tees, fairways and playable roughs.

35%	Sergei	strong creeping red fescue
25%	Barprince	slender creeping red fescue
20%	Musica	chewings fescue
20%	Beacon	hard fescue

Sowing rate: 20 - 35 g per sq.m Sowing depth: 8 - 12 mm
Over sowing rate: 15 - 25 g Min. cutting height: 7 mm

per 20 kg

Bar Extreme

Renovation and construction of heavy wear golf and bowling greens, fairways, driving ranges, cricket squares and cricket outfields.

40%	Eurocordus	dwarf perennial ryegrass
30%	Barsignum	dwarf perennial ryegrass
15%	Barolympic	dwarf perennial ryegrass
15%	Bargold	dwarf perennial ryegrass

Sowing rate: 25 - 35 g per sq.m Sowing depth: 12 - 15 mm

per 5 kg

per 20 kg

BAR EXTREME

TOP PERFORMING FINE-LEAVED RYEGRASS MIXTURE

GOLF TEES AND FAIRWAYS.
CRICKET AND SUMMER SPORTS

Quality in the yellow bag.
Find out more about how and
why this mixture works so well.

Barenbrug Bar Range Grass Seed Mixtures

Bar Extreme RPR

Extreme RPR combines the benefits of Bar Extreme with RPR creeping ryegrass technology. Fast establishment and quick recovery after wear is unrivalled.

40%	Shorty	dwarf perennial ryegrass
40%	Barclay II	RPR perennial ryegrass
20%	Eurocordus	dwarf perennial ryegrass

Sowing rate: 25 - 35 g per sq.m Sowing: Depth 12 - 15 mm
Over sowing rate: 15 - 25 g Min. cutting height: 10 mm
Per 20 kg

Bar Platinum

Exceptional ryegrass/fescue blend designed for fast establishment with a fine appearance, with additional wear tolerance.

30%	Barolympic	dwarf perennial ryegrass
30%	Barpearl	slender creeping red fescue
25%	Bargreen II	chewings fescue
15%	Viktorka	slender creeping red fescue

Sowing rate: 25 - 35 g per sq.m Sowing depth: 8 - 12 mm
Over sowing rate: 15 - 25 g Min. cutting height: 5 mm
per 5 kg
per 20 kg

Bar Medal

Construction, renovation and divotting of very heavy wear golf greens, surrounds, tees and fairways.

40%	Barpearl	slender creeping red fescue
40%	Barsignum	dwarf perennial ryegrass
20%	Barolympic	dwarf perennial ryegrass

Sowing rate: 25 - 35 g per sq.m Sowing depth: 8 - 12 mm
Over sowing rate: 15 - 25 g Min. cutting height: 5 mm
per 20 kg

Heavy Duty Turf

Bar 7

Renovation and repair of football, rugby and sportsfields.

30%	Barorlando	dwarf perennial ryegrass
30%	Eurosport	dwarf perennial ryegrass
20%	Eurocordus	dwarf perennial ryegrass
10%	Barcristalla	dwarf perennial ryegrass
10%	Barlicum	dwarf perennial ryegrass

Sowing rate: 30 - 50 g per sq.m Sowing depth: 12 - 15 mm
Over sowing rate: 15 - 30 g Min. cutting height: 18 mm
per 20 kg

Bar RPR Stadium

RPR Stadium is an outstanding new mixture designed to solve groundsmen's four biggest challenges on stadium pitches. Wear tolerance, recovery from wear, dark colour and leaf spot tolerance.

50%	Barorlando	dwarf perennial ryegrass
30%	Barcristalla	dwarf perennial ryegrass
20%	Barlibro	RPR perennial ryegrass

Sowing rate: 30 - 50 g per sq.m Sowing depth: 12 - 15 mm
Over sowing rate: 15 - 30 g Min. cutting height: 18 mm
per 20 kg

Bar 8

New construction of football, rugby pitches and sportsgrounds.

50%	Bardorado	dwarf perennial ryegrass
30%	Barillion	dwarf perennial ryegrass
20%	Bariris	smooth stalked meadow

Sowing rate: 30 - 40 g per sq.m Sowing depth: 12 - 15 mm
Over sowing rate: 15 - 20 g Min. cutting height: 18 mm
per 20 kg

Bar 9

Construction and renovation of sports pitches and outfields, playing fields and hard wearing lawns.

50%	Bardorado	dwarf perennial ryegrass
30%	Barlennium	dwarf perennial ryegrass
20%	Polka	strong creeping red fescue

Sowing rate: 30 - 40 g per sq.m Sowing depth: 12 - 15 mm
Over sowing rate: 15 - 20 g Min. cutting height: 18 mm
per 20 kg

Bar Sprint RPR

Construction, renovating and divotting of racecourses.

40%	Bardorado	dwarf perennial ryegrass
30%	Barillion	dwarf perennial ryegrass
15%	Copeland	dwarf perennial ryegrass
15%	Barclay II	RPR perennial ryegrass

Sowing rate: 25 - 35 g per sq.m Sowing depth: 12 - 15 mm
Over sowing rate: 15 - 20 g Min. cutting height: 50 mm
per 20 kg

Bar 50 SOS

Winter divotting and mid-season reinstatement of tees, fairways, walkways and racecourses.

50%	41R-1	amenity annual ryegrass
50%	Bardorado	dwarf perennial ryegrass

Sowing rate: 30 - 40 g per sq.m Sowing depth: 4 - 8 mm
Over sowing rate: 20 - 40 g Min. cutting height: 20 mm
per 20 kg

Barenbrug Bar Range Grass Seed Mixtures

Bar SOS 100

Ideal for mid season repair of perennial ryegrass winter sports pitches.

100% 41R-1 amenity annual ryegrass
 Sowing rate: 30 - 40 g per sq.m Sowing depth: 4 - 8 mm
 Over sowing rate: 20 - 40 g Min. cutting height: 20 mm
per 25 kg (note bag size)

Landscape

Bar 11

Hard wearing lawns, general landscaping, parks, housing and industrial developments.

40% Polka strong creeping red fescue
 40% Fandango dwarf perennial ryegrass
 20% Barswing chewings fescue
 Sowing rate: 25 - 35 g per sq.m Sowing depth: 8 - 12 mm
 Over sowing rate: 15 - 25 g Min. cutting height: 12 mm
per 20 kg

Bar 12

For general landscaping, ornamental lawns and embankments.

35% Polka strong creeping red fescue
 30% Barswing chewings fescue
 30% Helena slender creeping red fescue
 5% Highland browntop bent
 Sowing rate: 25 - 35 g per sq.m Sowing depth: 8 - 12 mm
 Over sowing rate: 10 - 20 g Min. cutting height: 7 mm
per 20 kg

Bar Shade

Dry shaded lawns and landscapes.

50% Barcampsia tufted hairgrass
 30% Sergei strong creeping red fescue
 20% Triana hard fescue
 Sowing rate: 25 - 35 g per sq.m Sowing depth: 4 - 6 mm
 Over sowing rate: 15 - 20 g Min. cutting height: 8 mm
per 5 kg
per 20 kg

Bar Salt and Drought

Can be used in a wide variety of areas on links golf courses, road and path verges, parks and general landscape areas without irrigation or in coastal regions.

30% Barpearl slender creeping red fescue
 30% Triana hard fescue
 20% Barolympic dwarf perennial ryegrass
 20% Bardorado dwarf perennial ryegrass
 Sowing rate: 30 - 40 g per sq.m Sowing Depth: 8 - 12 mm
 Over sowing rate: 20 - 30 g Min. Cutting height: 10 mm
per 20 kg

Horse Master General Purpose Paddock Mix

A mixture formulated to provide grazing for horses and ponies. The mixture is designed to perform well with low inputs of nitrogen but well timed applications before closing off for hay will produce the best results

6.3 kg perennial ryegrass
 4.2 kg perennial ryegrass dwarf
 2.1 kg strong creeping red fescue
 0.7 kg timothy
 0.7 kg smooth stalked meadow grass

Sowing rate: 14 kg/acre Sowing depth: 6 - 12 mm
per 14 kg (1 acre)

Special Grass Seed Mixtures

Specify which cultivars you require and we will be pleased to provide a quotation based on quality, quantity and delivery address.

BARENBRUG

Barenbrug Wild Flower Mixes

Barflora Wild Flowers

Barenbrug have developed a portfolio of wild flower seed mixtures that are specifically suited to particular growing environments and soil types. These produce colourful displays of wild flowers with a balanced mix of species to enhance the environment and attract wildlife.

Professional Shade/Woodland

A mixture specifically designed to be sown in areas of light shade such as hedgerows and woodland glades. Formulated using 80% grasses and 20% wild flowers, it is recommended to sow this mixture in early spring to allow germination before canopy close.

Sowing rate: 4 g per sq.m
per 1 kg

Professional Loam

For loams and lighter alluvial soils, this mixture contains 80% grasses and a comprehensive 20% colourful selection of native wild flowers that are found throughout Britain.

Sowing rate 4 g per sq.m
per 1 kg

Professional Clay

Wildflower mixture designed for heavy clay soils prone to waterlogging contains 80% grasses and 20% wild flowers.

Sowing rate 4 g per sq.m
per 1 kg

**A comprehensive full range of wild flower mixtures are available.
Full catalogue and prices available on request.**

All wild flower mixtures are subject to VAT.

Sovereign Turf

Regal Turf

For winter sports pitches, golf tees and hard wearing lawns. Dwarf perennial ryegrass, smooth stalked meadow grass, chewings fescue, strong creeping red fescue and slender creeping red fescue.

Elite Turf

For golf tees, surrounds and fine ornamental lawns. Smooth stalked meadow grass, chewings fescue, strong creeping red fescue, slender creeping red fescue and browntop bent.

New Century

Specifically grown for first class golf and bowling greens on sandy loam soils. Chewings fescue, slender creeping red fescue and browntop bent.

Xeris

Specially designed to need less moisture and withstand dry conditions, featuring tall fescue, dwarf perennial ryegrass and smooth stalked meadow grass. Xeris turf is the future of lawns for many UK householders faced with water scarcity and frequent hose pipe bans.

Turf and Nematodes

Paynes Turf

Locally grown in Essex and Suffolk on both free draining sandy loams and Essex clay.

Premium Grade Turf

For general lawns, landscaped areas and golf club use. Dwarf perennial ryegrass, slender creeping red fescue, strong creeping red fescue and chewing fescue.

Pro Sports Turf

For winter sports pitches, playing fields, golf courses and parks. Grown on sandy loam, dwarf perennial ryegrass, smooth stalked meadow grass, strong creeping red fescue, slender creeping red fescue.

Nematodes

Chafer Grubs and Leatherjackets cause extensive damage by feeding on plant roots. Birds, badgers, foxes and other small mammals searching and pecking for the larvae can rip up already weakened turf. Moles and badgers are especially attracted to the protein-filled larvae.

Nemasys G and Nemasys J provide the perfect biological control by entering the larvae which stops them feeding. This happens within three days of infection. The larvae then die within 10 - 14 days. The nematodes then complete their life cycle within the larvae, then enter the soil seeking out more hosts and so the pest control continues naturally.

ICL Nemasys G

A new biological solution for chafer grub control using insect parasitic nematodes. Must be refrigerated on delivery.

Pack coverage 500 sq.m
1 x 250 million tray

ICL Nemasys J

A new biological solution for leatherjacket control using insect parasitic nematodes. Must be refrigerated on delivery.

Pack coverage 500 sq.m
1 x 250 million tray

Chafer grub

Leatherjacket

Impact Organic Fertilizers

Organic fertilizers have become increasingly popular and far more effective in recent years. Indigrow's organic fertilizers are loaded in natural, plant based proteins. Our Impact Organic range was reformulated for 2012 and is now solely based on vegetable proteins and does not contain any genetically modified products. The Impact Organic range can be used all year round, depending on the formulation.

Our organic products are now predominantly produced from soybean meal, which is high in protein and an excellent choice for improved overall plant health and increased growth.

Once the soybean meal in the Impact Organic fertilizers is in the soil, micro-organisms break down the protein, producing valuable nitrate ions. The Indigrow Organic fertilizers contain more protein gram for gram than conventional animal waste products.

Impact Organic fertilizers contain seaweed meal which adds valuable micro nutrients, growth hormones, and vitamins which help disease tolerance, reduce plant stress from drought, and increase frost tolerance. They also contain added iron and magnesium for excellent colour response.

The Impact Organic range contains formulations suitable for fine turf, as well as for fairways and outfields. These formulations contain a balance of quick release nitrogen, phosphate and potassium (NPK) for an initial response from the plant. This initial release is followed by further response from the methylene urea and a sustained release from the plant proteins.

Impact Organic fertilizers are produced under ISO and HACCP certified conditions.

Product	Analysis	Slow release	Type	Application rate per sq.m	Bag size
Impact Organic Fine High quality micro granulated (1 - 1.2 mm) fertilizer.					
Impact Organic Fine 14:2:8 + MU Fine Spring and Summer		yes	microgran.	35 - 70 g	20 kg

Impact High K 0:0:50 100% Potassium Sulphate		no	microgran.	10 - 20 g	20 kg
Impact Organic Medium High quality mini granulated (2 - 4 mm) fertilizer.					
Impact Organic Medium 5:6:4 Medium 100% Organic		yes	minigran.	35 - 70 g	20 kg
Impact Organic Medium 14:2:8 + MU Medium Spring and Summer		yes	minigran.	35 - 70 g	20 kg
Impact Organic Medium 6:3:18 + Mg Medium Autumn Winter		yes	minigran.	35 - 70 g	20 kg

For the efficient spreading of your fertilizers, see our extensive range of fertilizer spreaders on pages 59 and 60. To work out the nutrient being applied per application see our helpful hints box on page 71.

ProTurf®

High impact fertilizer for sportsfields, fairways, tees and outfields.

High quality, blended fertilizers with controlled release technology. Formulated to give a strong immediate response, combined with 2 - 3 month longevity.

- Quick release portion gives immediate response
- Controlled release portion provides a steady supply of nutrient for up to 3 months
- High quality blend in a cost-effective formulation
- Contains polyhalite (with K, MgO and CaO)
- Two different analyses available:
 - 20.0.7 + 3CaO + MgO
 - 12.5.20 + 2CaO + 2MgO

For the efficient spreading of your fertilizers, see our extensive range of fertilizer spreaders on pages 59 and 60.
To work out the nutrient being applied per application see our helpful hints box on page 71.

Sierrablen® Plus

3 month, high performance controlled release fertilizer.

- 4 great products within the range
 - Spring starter 24-5-13
 - Active 19-5-18
 - Stress Control 15-0-28
 - Renovator 20-20-8
- Consistent release of nutrients over a 3-month period
- Mini granule
- Great for tees, fairways and sports pitches
- High level of coating reduces scorch risk
- 5-month **Sierrablen® Plus** range is also available

Enhance R & Enhance R Outfield

Bio-active fertilisers with Amino-Sorb®

EACH GRANULE CONTAINS:

- Low phosphate analysis to meet metabolic needs without encouraging Poa Annua
- Powerful trace element package with enhanced zinc
- Organic content to provide slow release nutrients and boost soil biota activity
- Amino-Sorb® amino acid supplement to help create a stress free environment
- Bacillus subtilis to increase resistance to pathogen attack

Micro granular fertiliser ideal for the fine turf of golf greens, bowling greens and high quality sports pitches. Micro-granules are just 1mm – 2mm in diameter.

Available in three formulations:

Spring & Summer
15+2+8+2MgO+TE
(with Amino-Sorb)

Autumn & Winter
5+2+15+2MgO+TE
(with Amino-Sorb)

Prime (zero phosphate)
5+0+10+4Fe+2MgO+TE
(with Amino Sorb)

Features homogenous granules 2mm – 4mm in diameter. Ideal for sports pitches, fairways and longer grown amenity turf

Available in two formulations:

Spring & Summer
15+2+6+TE
(with Amino-Sorb)

Autumn & Winter
6+2+10+TE
(with Amino-Sorb)

For the complete, year-round, solution to turf nutrition use Enhance R in association with Enhance F foliar fertilisers.

Vitax Fertilizers

Vitax Enhance R

Bio-active fine turf fertilizer range with added Amino-Sorb. Available in a micro granular (1 - 1.2 mm) formulation Vitax Enhance is a unique fertilizer specially developed for fine turf areas including golf greens, bowling greens and quality sports pitches. Each homogenous granule contains all components to ensure even spreading and turf colour plus Bacillus Subtillis, a microbial element that increases resistance to pathogen attack. It also includes Amino-Sorb the bio-stimulant that helps create a stress free environment and encourages healthy deep rooting.

Product	Analysis	Slow release	Type	Application rate per sq.m	Bag size
Enhance R S/S	15:2:8 + 2% MgO + trace elements	yes	microgran.	15 - 25 g	20 kg
Enhance R A/W	5:2:15 + 2% MgO + trace elements	yes	microgran.	15 - 25 g	20 kg
Enhance R Prime	5:0:10 + 4% Fe + 2% MgO + t/elements	yes	microgran.	15 - 25 g	20 kg

Enhance R Outfield

This high quality mini granular (3 - 4 mm) formulation has been specifically designed for fairways, sportsfields and outfield areas.

Enhance R Outfield S/S	15:2:6 + MgO + trace elements	yes	minigran.	25 g	20 kg
Enhance R Outfield A/W	6:2:10 + MgO + trace elements	yes	minigran.	25 g	20 kg

Vitax Soil Management Products

Easy to apply mini prills that are readily dispersed by water. SulpHur 95 should be used to reduce the soil pH following soil analysis results. The effect on soil pH should be evident between 2 - 3 months, with the degree of pH reduction varying on soil type.

SulpHur 95	95% sulphur for pH reduction	yes	mini-prill	15 g	15 kg
------------	------------------------------	-----	------------	------	-------

For the efficient spreading of your fertilizers, see our extensive range of fertilizer spreaders on pages 59 and 60. To work out the nutrient being applied per application see our helpful hints box on page 71.

For more information on Vitax Swardphite and Vitasil please go to page 25.

Straight Fertilizers

We supply a comprehensive range of traditional straight fertilizers (supply only one major plant food) and balanced general fertilizers (supply all three major NPK nutrients). Some of these are inorganic, powdered or granular and some are organic solids.

Granulated Lime

A fine granular product for easy, even and accurate spreading, with reduced dust. Useful source of calcium and magnesium. Application rate various.

20 kg

Dried Blood

11:0:0 Straight nitrogen organic fertilizer.

A safe source of quick acting organic nitrogen which naturally produces more vigorous growth. Application rate 35 g sq.m.

25 kg

Prestige Fish, Blood and Bone

5:5:6.5 NPK fertilizer for general garden use.

A good general purpose, organic fertilizer ideal for use all round the garden. Application rate 70 g sq.m.

25 kg

Greenvale Organic Pellets

5:3:3 Nitrogen, phosphate and potash organic fertilizer.

A genuine organic fertilizer which also contains a range of trace elements essential for root and plant development. Application rate 100 - 250 g sq.m.

25 kg

Prestige Growmore Granular

7:7:7 Balanced nitrogen, phosphate and potash fertilizer.

A multi purpose plant food with an even balance of nutrients suitable for all crops either as a base or a top dressing. Application rate 70 - 130 g sq.m.

25 kg

Prestige Kieserite

16% Mg. A readily available form of magnesium for turf which helps correct magnesium deficiency in sandy soils. Application rate 17 g sq.m.

25 kg

Magnesium Sulphate (Technical Grade)

A high quality 16% MgO fully water soluble product for horticultural use. (Bitter salts) Application rate various.

25 kg

Mono Ammonium Phosphate (Technical Grade)

MAP 12-61-0. Highly efficient water soluble source of P&K used at early plant establishment for root development. Application rate various.

25 kg

Potassium Nitrate (Technical Grade)

13:0:46 (totally soluble) giving the ideal combination of low nitrogen and high potassium. Apply as a liquid formulation. 25 - 50 kg in 450 - 600 litres of water per hectare.

25 kg

Prestige Rose Food

5:5:10 For use around rose bushes.

A balanced general fertilizer supplying all three major NPK nutrients. Application rate 35 - 70 g sq.m.

25 kg

Prestige Sulphate of Ammonia (Soluble)

21:0:0 Quick acting nitrogen.

Soluble sulphate of Ammonia contains 21% nitrogen and 24% sulphur. Application rate 25 kilos per hectare. Soluble formation.

25 kg

Prestige Sulphate of Iron (Soluble)

21% Fe (heptahydrate formulation). A high quality soluble version which can also be applied as a powder or as a liquid. Applied in liquid formulation, extra attention must be paid when dissolving this fertilizer to avoid blockages and to ensure sprayability. Apply 20 - 30 kg in 800 - 1,000 litres of water per hectare. Powder application rate 9 g per sq.m.

25 kg

Prestige Sulphate of Potash

0:0:50 Powdered potassium fertilizer which hardens plants.

A fast acting source of potassium to help the development of healthy fruit and flowers. Application rate 35 g sq.m.

25 kg

Urea Prilled (Technical Grade)

46:0:0 (totally soluble) giving a high level of nitrogen. Best applied in a liquid formulation using approx. 25 - 50 kg in 450 - 600 litres of water per hectare.

25 kg

For the efficient spreading of your fertilizers, see our extensive range of fertilizer spreaders on pages 59 and 60.

Farmura Organic & Liquid Fertilizers

Organic Fertilizers

Farmura Turf

The original Farmura liquid organic fertilizer. As a soil conditioner it will increase the soil bacteria count enabling locked up nutrients to become available to the plant.

Pack coverage 1,500 sq.m

25 ltr

Pack coverage 12,600 sq.m

210 ltr

Farmura Porthcawl

Containing less than 1% nitrogen, this is the flagship of the Farmura organic range. The formulation of Farmura Turf, seaweed, iron and other special ingredients are of particular benefit when used on fairways and outfields. This product can also be used on golf greens and bowling greens, where for best results alternate with a liquid NPK fertilizer.

Pack coverage 2,500 sq.m

25 ltr

Pack coverage 21,000 sq.m

210 ltr

Farmura Farmsea 10

Mixture of Farmura Liquid and seaweed for those who wish to maximise the effectiveness of their Farmura programme by increasing the complimentary benefits of seaweed.

Pack coverage 2,500 sq.m

25 ltr

Pack coverage 21,000 sq.m

210 ltr

Farmura Providian

A complete, balanced plant stress and turfgrass health enhancement package. It strengthens turf and maximises the growing environment before the onset of stress.

Pack coverage 4,000 - 5,000 sq.m

10 ltr

Farmura Liquid Seaweed

A new range of high quality liquid seaweed that provides a food source to stimulate bacteria and fungal life. It should be used as a soil conditioner and plant growth stimulant.

Pack coverage 25,000 sq.m

25 ltr

Farmura Combi

A quality foliar turf treatment containing a full range of trace elements. The trace elements are fully chelated to maintain availability for the turf to ensure optimal results.

Pack coverage 5,000 - 10,000 sq.m

1 ltr

Farmura Calcium Plus

19.5:0:0 + 9% Calcium

A root and foliar feed that builds and strengthens cell walls in roots, stems and leaves. High levels of calcium in the cell of the plant make the cell wall rigid, which strengthens the turf against disease.

Pack coverage various

10 ltr

Pack coverage various

210 ltr

Farmura Premium K

0:0:38

A revolutionary source of potassium having superior foliar absorption. Premium K has been demonstrated to have up to 5 times the foliar uptake of traditional forms of potassium.

Pack coverage various

10 ltr

Pack coverage various

210 ltr

Farmura Premium N

35:0:0

A high performance liquid fertilizer with the nitrogen source being methylene urea. This summer fertilizer provides high quality, high strength nitrogen at an affordable price.

Pack coverage various

25 ltr

Pack coverage various

210 ltr

Flo-Gro Super Concentrates

Farmura Flo-Gro Spring & Summer

36:0:12 + 2% S + 1% Mg.

A balanced 3:1 nitrogen:potash analysis with zero phosphate and sulphur. The ideal liquid fertilizer for balanced nutrient supply and good colour without excessive top growth.

Pack coverage 2,000 sq.m giving 13:0:4 nutrient value

10 ltr

Farmura Flo-Gro NK Special

31:0:26 + 5% S + 2% Mg.

A balanced nitrogen and potash fertilizer with sulphur. Particularly suitable for sandy and light soils with low potash.

Pack coverage 2,500 sq.m giving 11:0:9 nutrient value

10 ltr

Farmura Flo-Gro Complete

30:7:22

A specially formulated balanced fertilizer where phosphates may be required as well as nitrogen and potash. Complete is a good all round standard for use throughout the year.

Pack coverage 3,333 sq.m giving 8:2:6 nutrient value

10 ltr

Farmura Flo-Gro Super Nitrogen

38:0:0

A high nitrogen fertilizer, ideal for intensively managed fine turf where phosphate and potash levels are in sufficient supply.

Pack coverage 2,000 sq.m giving 18:0:0 nutrient value

10 ltr

Farmura Flo-Gro Potash Plus

2.5:0:25.5

An autumn treatment with sulphur, iron and magnesium to improve the colour and hardness of the grass in readiness for winter.

Pack coverage 2,500 sq.m giving 0:0:6 nutrient value

10 ltr

THE FINAL PIECES

A synergistic blend of seaweed extract, amino acids, iron, magnesium and manganese in one convenient package.

A balanced growing environment is necessary to produce healthy turf that can withstand abiotic stresses and less than ideal weather conditions. Providian is a complete, balanced plant stress and turfgrass health enhancement package that maximizes the growing environment and strengthens turf to better defend itself when conditions begin to deteriorate.

Benefits from Providian include:

- Increases stress resilience and water stress tolerance
- Enhances turfgrass quality and visual presentation
- Increases photosynthesis of the plant
- Improves root development
- Speeds recovery of stressed turf
- Promotes a more natural and sustainable green colour

Learn more about Providian by visiting www.farmura.com

PORTHCAWL

now with

Our premier organic fertiliser just got better!

Porthcawl now includes Aquatrols patented Synergy technology, a superior uptake enhancement component that improves the distribution, availability, and uptake of water and nutrients in the soil profile.

The addition of Synergy technology perfectly complements Porthcawl's unique blend of organic fertiliser, seaweed extracts, and iron, giving turf managers even greater performance.

Benefits of Synergy:

- Ensures better distribution of inputs throughout the rootzone
- Makes nutrients more available to plant roots
- Helps to maximize nitrogen efficiency
- Creates a more balanced growing environment

For more information, contact Farmura today!

Prestige Liquid Fertilizers

Prestige NPK Spring Summer

12:4:8 + 5% seaweed extract.

All round general purpose spring and summer product including seaweed extract.

Pack coverage 1,666 - 5,000 sq.m

20 ltr

Prestige NK Spring Summer

15:0:12 + 2% Fe.

A balanced zero phosphate feed for spring and summer use with 2% iron for immediate colour up.

Pack coverage 1,666 - 5,000 sq.m

20 ltr

Prestige NK Autumn Winter

5:0:12 + 5% Fe.

A high strength potassium feed for autumn and winter use, providing winter hardiness with a strong greenup effect.

Pack coverage 5,000 - 10,000 sq.m

20 ltr

Prestige NPK Autumn Winter

6:4:12 + 5% seaweed extract.

A balanced NPK (high potash) fertilizer for general use which includes sand based and traditional constructed greens.

Pack coverage 1,666 - 5,000 sq.m

20 ltr

Prestige Super Fairway + Iron

10:0:0 + 5% Fe + 5% Sugars.

Designed to enhance the visual quality of golf fairways and sports fields. It is a blend of ureic N, sulphate of iron and carbohydrates.

Pack coverage 100,000 sq.m (10 hectares)

200 ltr

Prestige Foliar Liquids

Prestige High N Spring Summer

25:0:0 A high N controlled release 4 - 6 week liquid fertilizer for turf containing ammonium sulphate, methylene urea and straight urea.

Pack coverage 1,666 - 10,000 sq.m

20 ltr

Prestige Green Seaweed

Seaweed extract + 3.7% Fe. A seaweed extract plus iron helps to prevent leaf yellowing and gives an excellent green colour.

Pack coverage 10,000 sq.m

20 ltr

Prestige Super Seaweed

30% seaweed extract.

New formulation for 2017. Concentrated seaweed extract containing a nutrient enhanced package.

Pack coverage 10,000 - 20,000 sq.m

20 ltr

Prestige Nugro 6:2:4 Organic Liquid

A high performance, organic plant nutrient fertilizer, derived from liquidised plant proteins. Apply as and when required as a general foliar spray. Prestige Nugro 6:2:4 Organic liquid can also be used as a tank mix with selective herbicides to enhance their performance and to give good colour to the sward. Apply 5 - 10 litres in 200 - 600 litres water per hectare.

Pack coverage 10,000 - 20,000 sq.m

10 ltr

Prestige Super Micro Nutrient TE Liquid

A fully chelated formulation which improves the foliar absorption by the leaf. Once inside the leaf the chelates break down making the nutrients readily available to the plant.

Pack coverage 20,000 - 33,333 sq.m

10 ltr

Prestige Super Foliar Liquids

The Prestige range has been specifically designed to give the highest level of foliar uptake and performance. Enhancing the performance are surfactants a buffered pH and a full trace element package.

Foliar Autumn 6:3:12 + TE

A high strength potassium feed for autumn and winter use.

Pack coverage 5,000 - 10,000 sq.m

10 ltr

Foliar Spring and Summer 14:3:7 + TE

All round general purpose spring and summer use.

Pack coverage 5,000 - 10,000 sq.m

10 ltr

Foliar Zero Phosphate 10:0:10 + TE

A balanced zero phosphate for spring and summer use.

Pack coverage 5,000 - 10,000 sq.m

10 ltr

Prestige Super Foliar Liquids are 100% soluble and contain compatibility agents to improve mixing with water and other products in a spray tank. Complexing agents guarantee no adverse chemical reactions when pesticides are added in a tank mix.

Vitalnova[®] Stressbuster

Liquid treatment to help condition turf against stress and also aid recovery from stress.

- A turf specific biostimulant that helps condition the turf against stress
- Provides turf boost at any time of year
- Immediate colour-up response
- 7-0-0 + 2Fe + sugars + wetting agent + amino + TE

© Registered Trade Mark of ICL Limited

ICL Liquid Fertilizers

ICL Greenmaster High N

25:0:0 + 2% MgO + trace elements.
Early spring fertilizer plus magnesium for rapid green up.
Pack coverage 833 - 2,500 sq.m
10 ltr

ICL Greenmaster NK

10:0:10 + trace elements.
Phosphate free NK fertilizer for all year round use.
Pack coverage 833 - 2,500 sq.m
10 ltr

ICL Greenmaster Spring and Summer

12:4:6 + trace elements.
Complete NPK formula for main summer season feeding.
Pack coverage 1,250 - 3,333 sq.m
10 ltr

ICL Greenmaster High K

3:3:10 + trace elements.
High potash autumn and winter NPK fertilizer, which increases stress tolerance.
Pack coverage 800 - 2,500 sq.m
10 ltr

ICL Greenmaster Step Liquid

Chelated trace elements.
Ideal for correcting plant nutrient imbalances.
Pack coverage 1,666 - 5,000 sq.m
10 ltr

ICL Greenmaster Ca-Booster

8:0:0 + 9% CaO
Strengthens cell walls to toughen turf during stress conditions.
Pack coverage 1,666 - 5,000 sq.m
10 ltr

ICL Vitalnova Blade

5:6.5:3.5 + carbohydrates + seaweed + TE
Carbohydrate and seaweed micro nutrients. When used within an overall turf maintenance programme, usage has shown increased grass plant sward density and health.
Pack coverage approx. 2,000 - 4,000 sq.m
10 ltr

ICL Water Soluble Fertilizers

ICL Vitalnova StressBuster

7:0:0 + 2% Fe + sugars + WA + amino + TE
Unique liquid formulation designed to pre condition turf against stress and to help generate quick recovery.
Pack coverage 2,000 - 4,000 sq.m
10 ltr

ICL Vitalnova AminoBoost

8:0:7 + 10% amino acids
Liquid fertiliser containing amino acids designed for foliar feeding in the summer.
Pack coverage 10,000 sq.m
10 ltr

ICL Vitalnova SILK

0:7:12 + 6% Si
Potassium silicate formulation designed for leaf and stem cell strengthening.
Pack coverage 5,000 sq.m
10 ltr

ICL Sportsmaster Liquid Fertilizers

ICL Sportsmaster Liquid Fe

A cost effective liquid iron treatment for use on sports fields and fairways. It gives a quick and long lasting green up (up to four weeks) and is an ideal tank-mix partner for Primo Maxx.
Pack coverage 50,000 - 100,000 sq.m
200 ltr

ICL Sportsmaster Water Soluble Fertilizers

Premium foliar fertilizers containing TMax for enhanced foliar and root nutrient uptake.

ICL Sportsmaster WSF High N

35:0:14 + trace elements.
High nitrogen ensures a fast initial effect lasts 2 - 4 weeks.
Pack coverage 2,500 - 10,000 sq.m
15 kg

ICL Sportsmaster WSF High K

15:0:43 + trace elements.
Ideal to apply prior to stress conditions such as drought or winter. Lasts 2 - 4 weeks.
Pack coverage 2,500 - 10,000 sq.m
15 kg

ICL Sportsmaster SeaMax WSF Seaweed

A soluble powder premium product containing over 75% seaweed to improve turf colour and quality.
Pack coverage 10,000 sq.m
1 kg

itagreen
Amenity

AMINO SORB®

The key to stress-free turf

Amino Sorb is a proven amino acid supplement that helps turf withstand stress conditions, reduces the occurrence of stress induced diseases such as Anthracnose and Dollar Spot and enhances seed germination and root and shoot growth.

Available in two formulations:

Amino Sorb F®

Foliar absorbed supplement that increases photosynthesis and chlorophyll production to help maintain overall plant health. Recommended for use during the growing season when turf has difficulty absorbing nutrients from the soil.

Amino Sorb R®

Root absorbed supplement that improves nutrient uptake, promotes root growth, enhances germination and provides stress relief. Recommended for application in Spring and Autumn.

Amino Sorb® is a registered trademark of Bioiberica

Vitax Liquid Fertilizers

Vitax Enhance F (Foliar Fertilizer)

Developed principally as an easily absorbed rapid response foliar fertilizer for fine turf. It is also suitable for root-zone feeding at high application rates.

Vitax Enhance F Spring and Summer

12:1.5:6 + trace elements (with Amino-Sorb).

Formulated to contain all components to promote stress resistance, deep rooting, sward density and good colour.

Pack coverage foliar 5,000 sq.m

Pack coverage root-zone 667 - 2,000 sq.m

10 ltr

Vitax Enhance F Autumn and Winter

4:1.5:12 + trace elements (with Amino-Sorb).

Formulated to contain all components to promote stress resistance, deep rooting, sward density and good colour.

Pack coverage foliar 5,000 sq.m

Pack coverage root-zone 667 - 2,000 sq.m

10 ltr

Vitax Enhance F Prime Spring Starter

5:0:10 + trace elements (with Amino-Sorb).

Formulated to contain all components to promote stress resistance, deep rooting, sward density and good colour.

Pack coverage foliar 5,000 sq.m

Pack coverage root-zone 667 - 2,000 sq.m

10 ltr

Seaturf Liquids

Specially formulated for sports turf, the Vitax Seaturf range is produced from the seaweed laminaria digitata harvested in the clear Atlantic Ocean.

Vitax Seaturf Super Concentrate

A concentrated seaweed extract to improve turf development without stimulating soft grass growth. It promotes early season root growth by stimulating photosynthesis.

Pack coverage 10,000 sq.m

10 ltr

Vitax Seaturf Complete

12:0:6

An ideal seaweed turf stimulant for use during the growing season. The balance of nitrogen and potash being provided to give a rapid response for wear recovery and resistance to drought.

Pack coverage 1,515 sq.m

10 ltr

Amino-Sorb Biostimulants

Vitax Seaturf Iron Extra

6% Fe + 3% N.

The addition of extra iron to Seaturf will give a fast greenup, usually within 24 hours, which will last for four to six weeks. Seaturf Iron Extra will also act as a turf hardener, assisting in the prevention of turf diseases.

Pack coverage 2,500 sq.m

10 ltr

Amino-Sorb Biostimulants

Proven amino acid technology creates a stress free environment, which helps turf to thrive and achieve its maximum performance whatever the circumstances. Under normal circumstances turf plants synthesise their own amino acids, but when under stress conditions they need a little help.

Vitax Amino-Sorb F

Foliage absorbed amino acid supplement will give turf relief from stress and helps it to maintain overall quality by increasing the photosynthesis rate and chlorophyll concentration.

Pack coverage 10,000 sq.m

5 ltr

Vitax Amino-Sorb R

Root absorbed amino acid supplement expressly formulated for root growth, enhanced germination and stress relief. It also increases nutrient uptake and creates conditions for weedkillers and fungicides to work more efficiently.

Pack coverage 3,333 sq.m

5 ltr

Vitax SwardPhite

4:30:8

An innovative fertilizer based on Potassium Phosphite (PO₃). This promotes healthy turf growth by aiding the turf's natural defence systems and by stimulating meristem cell activity in roots and crowns.

Pack coverage 25,000 sq.m

10 ltr

Vitax VitaSil

14% Potash (K₂O) + 7% Silicon (Si) + humates.

A liquid silicon stress reducer for turf. VitaSil provides essential Potassium and beneficial Silicon, plus uptake enhancing humates.

Pack coverage 20,000 sq.m

10 ltr

vitax
Amenity

Enhance F Foliar Fertiliser

Easily-absorbed, rapid release foliar fertiliser with Amino-Sorb®.
Developed for fine turf areas including golf greens, bowling greens and quality sports pitches.

- Developed principally as a foliar fertiliser but is also suitable for root-zone feeding
- Low phosphate analysis to meet metabolic needs without encouraging Poa Annua
- Powerful trace element package with enhanced zinc
- Organic content provides slow release nutrients and boosts soil biota activity
- Incorporates Amino-Sorb® amino acids supplement to create a stress-free environment
- Formulated to contain all components to promote stress resistance, deep rooting, sward bulk and good colour

Enhance is available in the following formulations:

Spring and Summer -

12 + 1.5 + 6 + TE + Amino-Sorb

Autumn and Winter -

4 + 1.5 + 12 + TE + Amino-Sorb

Prime (early and late) -

5 + 0 + 10 - Amino-Sorb

For the complete year-round solution to turf nutrition use Enhance F in association with Enhance R micro-granular fertiliser.

Granular and Liquid Irons

Fusion Granular

20% slow release Fe.

This is a mix of iron, magnesium, manganese, zinc and copper. A true slow release micronutrient formulation lasting up to 12 weeks. Good strong colour, hardening and toughening the plant especially during autumn and winter months.

Pack coverage 1,000 sq.m

20 kg

Prestige Amour

9% Fe + 4.5% MgO + seaweed

A slow release iron, magnesium and seaweed blend specifically designed to give an even, steady release ensuring plant strength, health and colour without promoting soft growth. With a 1 - 2 mm homogenous granulation it breaks down quickly and lasts for about 12 weeks.

Pack coverage 714 sq.m

25 kg

Liquid Irons

Farmura Ferrosol

6% Fe and 4% S

A foliar applied unique iron nitrogen bonded complex which provides a quick greenup of the turf without over stimulation of growth. Ideal for use at any time when turf is in need of a greenup boost, and in the autumn it will harden the turf and strengthen it against disease.

Pack coverage 5,000 sq.m

10 ltr

Prestige Super Green Autumn

2:0:6 + 6% Fe.

A concentrated liquid iron and nitrogen potash fertilizer. It gives rapid greenup (usually within 24 hours) and lasts up to 6 weeks. It colours and hardens the turf without stimulating soft growth.

Pack coverage 5,000 - 10,000 sq.m

20 ltr

ICL Greenmaster Effect Fe Liquid Iron

This new 6.9% liquid iron represents the next generation of liquid iron technology. It is based on a new and unique formulation, which combines both complexed and chelated iron giving both long lasting and rapid-acting results.

Pack coverage 5,000 sq.m

10 ltr

Water Soluble Irons

Prestige Heptasol

A fast acting soluble iron (19.5%) for the greening and toughening of sports turf. Due to the sulphur content (12.5%), regular applications can help to acidify soil at the surface which will also help to reduce worm activity. Heptasol can also be used for moss control where it burns off the moss and to help with disease prevention where it toughens the leaf blade.

Pack coverage 5,000 sq.m

12.5 kg

ICL Sierrasol Sportsmaster WSF Iron

A high quality ferrous sulphate (20% iron) formulation for rapid greenup, hardening and toughening of the sward. Ideal for use during autumn and winter low temperature conditions.

Pack coverage 7,500 - 15,000 sq.m

15 kg

Vitax 50/50 Soluble Iron

A fast acting soluble 20.5% ferrous sulphate (iron) formulation for rapid greenup and toughening of the sward to promote disease resistance.

Pack coverage 4,000 sq.m

10 kg

Indigrow Fusion Granular

Iron has been used in turf management for numerous years and is probably the most important micronutrient supplement in regards to turf grass management, quality and performance. Iron is an essential component of the chlorophyll molecule and applications of iron will stimulate chlorophyll production. One of the most common uses is to give good colour response without any significant growth, particularly useful during the autumn and winter months.

The Fusion range of iron supplements offers a comprehensive range of different iron formulations to suit a wide number of environmental and financial situations. Applications of all Fusion iron supplements will result in dark green turf and will help toughen the sward making it more resistant to stress and disease.

For further information on the complete Indigrow range please visit www.indigrow.com

Fusion Slow Release Granular Iron and Micronutrients

Fusion Granular is a mix of iron (20%), manganese (8%), magnesium (5%), zinc (1.5%) and copper (0.5%) all chemically ionized with natural carbohydrates or natural reducing sugars to form sucates so that each of the micronutrients is in the same ionized form as that which the plant assimilates.

Soil Conditioners

Barclay Biosorb

Biosorb is a calcined naturally occurring, free flowing ceramic granule for the conditioning of sand, soil and composts. It works by increasing percolation rates and improving aeration on free draining soils with a low CEC.

Fine 0.5 - 1 mm
30 ltr

Barclay Energise

Energise contains menefee humate (a natural humic acid) which improves the soil structure helping to maintain optimal quantities of air, water and nutrients. It encourages root growth which promotes stronger, healthier turf. Tank mix WSG with liquid fertilizers for better uptake of the nutrients.

Energise G (granular)

22.68 kg

Energise WSG Seamate

4.54 kg

Prestige W Soil Conditioner

2.5:1:1

A natural based and balanced low analysis winter soil conditioner containing slow release nutrients. Also containing specific plant extracts, it increases microbial activity boosting plant health and reducing turf stress.

Pack coverage 666 sq.m

20 kg

Rubber Crumb Verde

Verde Rubber Crumb is an innovative way to reinforce turf, this product should be used when the grass is actively growing and applied after tining or spiking.

Standard 1 - 3 mm

25 kg

Rubber Field Grass Mats

We are able to supply rubber grass mats, which are ideal for outdoor ground cover. They are weather resistant and maintenance free. Grass pegs and grass peg ties will be required to join these together and to fix into the ground.

1 m x 1.5 m x 23 mm

Rigel-G

Is a silicon and garlic based plant nutrient that helps plants overcome stress caused by difficult growing conditions such as drought, disease and insect damage. Rigel-G helps strengthen plant tissue and the unique combination of silicon and a salicylic acid derivative plus garlic has been found to enable plants to resist a range of insect attacks.

Pack coverage 3,333 - 5,000 sq.m

1 ltr

Zeolite

Clinoptilolite Zeolite is a naturally occurring porous mineral with an extremely high cation exchange capacity. Added to sports turf areas such as golf greens, Zeolite will reduce compaction and increase moisture and aid nutrient retention.

Fine 0.5 - 1 mm

25 kg

Medium 1 - 3 mm

25 kg

Prestige Speciality Products

This range of unique speciality products has been developed to deal with major turf problems. Manufactured from the highest quality ingredients, these products provide the answer to many greenkeepers problems.

Prestige Super D Thatch

A specifically formulated microbial bio-stimulant and enzyme product, that boosts microbial populations, increasing rooting and plant health. This product reduces thatch especially when used in conjunction with a high aeration and thatch removal mechanical input.

Pack coverage 10,000 sq.m

10 ltr

Prestige Super Establisher

3:1:4 + Mycorrhizae + 5% Humic Acid.

This unique granular fertilizer and bio-stimulant increases seed growth and establishment. It has both mycorrhizae and humic acid added to aid turf recovery following aeration and turf wear. Best applied after spiking or verti-cutting it must have soil contact. Apply 40 g per sq.m as a standard feed.

Pack coverage 500 sq.m

20 kg

Prestige Super Humic Acid

A specifically formulated bio-stimulant, that increases rooting and plant health. Can be used all year round but best timing is in spring and autumn. Apply 10 litres in 500 - 600 litres water.

Pack coverage 5,000 sq.m

5 ltr

Prestige Super Liquid Carbon

An effective liquid carbon based treatment for dealing with oil spillages. It is essential that all oil spillages are treated as soon as they occur, this will provide optimum results. First remove as much oil as possible with absorbent paper then apply the product. Apply 10 litres in 50 litres water per 500 sq.m

Pack coverage 250 sq.m

5 ltr

Prestige Super Potassium Silicate

6% Silica (Si) + 15% Soluble Potash (K₂O).

A new unique product specifically formulated for turf. This specialist silica and potash fertilizer is designed to make your grass stand up straight. Improves uniform cutting and appearance of turf with increased ball roll and green speed.

Pack coverage 10,000 sq.m

10 ltr

Energise G

for green power,
look no further

Energise G adds buzz to your green. Based on humic acid and carbon, Energise G not only improves soil structure, drainage and aeration, but also encourages healthy microbial activity in the soil profile.

Its effect? Healthy, deep rooting grass plants, full of vigour and ready for rigour.

Energise G.
It's energy for grass.

Growth Regulators

ICL Primo MaXX

Trinexapac-ethyl.

The new generation plant growth management tool. 'It makes good turf great'.

- Liquid formulation for easy, safe use
- Flexible application rates
- Compatible and easily mixable with other products
- Increased and enhanced product uptake
- Aids root development

Pack coverage depends on type of area, type of grass and height of cut. Do not apply Primo MaXX to stressed turf, for best results Primo MaXX should be tank mixed with a seaweed or liquid fertiliser product.

Use plant protection products safely. Always read the label and product information before use.

Liquid Moss Control

Brinton's MMC Pro

MMC Pro is a broad spectrum antiviral and antibacterial disinfectant especially developed to target black/green mould, algae and moss on hard surfaces only. Apply 5 litres mixed with 20 litres of water and spray to saturate the surface. Dilution rate 1:4 equals 25 useable litres covering approx. 75 - 150 sq.m.

Pack coverage various
5 ltr

HSE No. 7284

Certis Mogeton

Quinoclamine.

A horticultural turf treatment for golf courses on only managed amenity turf. One application per year between May and August when moss is actively growing. Mogeton contains an orange indicator dye so that the operator can see which areas have been treated - this orange dye fades shortly after application.

Pack coverage 500 sq.m
750 g

MAPP No. 15837

ICL Jewel

Carfentrazone, mecoprop-p.

Jewel is the first weed and mosskiller featuring two powerful herbicides which make this product unique. Jewel has a post emergence contact activity with Carfentrazone-ethyl and a systemic activity with Mecoprop-P. It can be used on all turf grass species. For moss control it is recommended that following death of the moss the turf is scarified. Jewel can be used from March to September but best results are achieved when weeds and moss are growing strongly.

Pack coverage 10,000 sq.m
1.5 kg

MAPP No. 14327

ICL Ranger

Chloride, organic acid and surfactants

A hard surface cleaner for use on concrete, asphalt, tarmac, block paving, artificial sports surfaces and any hard surface areas.

Pack coverage 500 sq.m
5 ltr

HSE No. 145

Indigrow Opal Green (Moss Biocide)

For the control of algae, mosses, moulds, fungi, slime, liverworts and lichen on hard surfaces only including concrete, asphalt, tarmac, block paving and artificial sports surfaces. Opal Green is based around a blend of organic acids, biocides and surfactants. The surfactants allow the acid and biocide to spread and penetrate the moss or algae. The acid then kills them directly by burning.

The standard rate of application is 5 litres per 1000 sq.m in 50 litres of water (50 litres per hectare in 500 litres of water). This low water rate offers significant advantages over competitive products and results in saving of time and labour resource. For more permeable surfaces such as Astroturf, a higher water rate of 1000 litres per hectare should be used.

Pack coverage 1,000 sq.m
5 ltr

HSE No. 9114

Indigrow

Hard Surface Biocide

Plant Protection Products have become more prevalent in recent years as amenity turf managers have increased their aesthetic aspirations. As a result, we have developed a selection of Plant Protection Products designed to help control a wide range of weeds in managed amenity situations. Indigrow's Plant Protection Products are some of the newest additions to our product range and are designed to treat a variety of turf problems.

The demand for the latest technologies to fight disease, and other turf issues requires us to constantly develop our range.

For further information on the complete Indigrow range please visit www.indigrow.com

IMPORTANT: Please use plant protection products safely. Always read the label and product information before use.

Opal Green

Opal Green is based around a blend of organic acids, biocides and surfactants. When applied to the surface, the surfactants allow the acid and biocide to spread and penetrate. The acid then kills them directly by burning. Ideal for hard surface weed control. Use on concrete, asphalt, tarmac, paving and artificial surfaces. Effective for use on algae, mould and fungi.

For more permeable surfaces such as artificial turf a higher water rate of 1,000 lt/Ha should be used.

A ready to use, trigger spray pack for spot treatment on a wide variety of broadleaved weeds.

Pack coverage various

MAPP No. 15195

12 x 750 ml

Tips for using selective weedkillers

All selectives work best when the weeds are growing well (April - September) and when moisture levels are good. The types of weed and whether it is fine turf (golf and bowls) or outfield (fairways and sports fields) dictates the product to be used. Using a spray marker dye will ensure accurate application avoiding missed areas and possible turf damage due to overlap. Avoid using selective weedkillers in drought or frosty conditions.

Use plant protection products safely. Always read the label and product information before use.

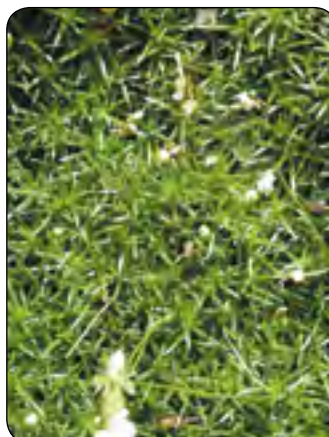

Daisy

Dandelion

Pearlwort

Yarrow

Holster XL[®]

Speedwell control

Holster XL is a combination product containing 105g/l fluroxypyr, 285g/l 2 4-D and 52.5g/l dicamba. It is registered for use for the control of a range of broad leaved weeds in managed amenity turf including fine turf and amenity grassland.

Excellent performance against slender speedwell in amenity turfgrass:

- Apply in spring and early summer before weeds begin to flower
- Apply when weeds are small and actively growing
- Also covers a wide range of broad-leaved weeds
- Apply at a maximum rate of 2L/ha
- Ensure water PH is in the range of 4 to 7 for optimum results
- Spray on to a dry target leaf

Remember:

- Good control relies on adequate soil moisture
- Do not spray three days either side of mowing
- More than one application may be required

Be aware of:

- Drift on to susceptible crops and non-target species
- Frost or conditions when grass is suffering from stress
- Avoid water contamination

Serious about weed control? Then Kerb™ them.

Banish annual and perennial grasses with an application of Kerb™ Granules.

Used pre-or post-emergence, Kerb™ Granules is a long-term residual herbicide that will also control a wide range of other weeds in farm and commercial forestry, ornamental plantings and recreation areas.

Formulated with propyzamide, Kerb™ Granules has a highly effective mode of action that disrupts the growth process and ensures weed death. The lethal dose is absorbed only through the roots, which means applications can be made over the foliage of tolerant species, making it easy and simple to apply.

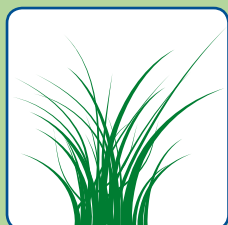

Get Kerb™, get results.

Belchim Chikara

Flazasulfuron.

Broad spectrum herbicide for use in non crop situations. If weeds are emerged a tank mixture with an amenity glyphosate is recommended to give both initial control and persistent residual control for up to 5 months.

Pack coverage 3,333 sq.m MAPP No. 14189
50 g

Dow Grazon Pro

Triclopyr and Clopyralid

Herbicide for the control of perennial broad leaf weeds including nettles, docks, thistles, brambles, broom and gorse. 60ml in 10 ltr water spot treatment

MAPP No. 15785
1 ltr

ICL EcoPlugs Max

Glyphosate.

Ecoplug Max is an effective non-selective herbicide tree stump control application method which kills the whole root system of targeted trees with no effect on surrounding trees.

Pack coverage various MAPP No. 14741

Pack 100 plugs

ICL Ecoplug Drill Bit (available if required)

ICL Hammer

Pryaflufen-ethyl and glyphosate.

A rapid action total herbicide that works very fast on plants that have emerged. Rainfast within 6 hours. Hammer can be successfully used on a very broad range of weeds.

Pack coverage 5,714 - 11,764 sq.m MAPP No. 15060
5 ltr

ICL Icade

Aminopyralid and triclopyr.

For the control of invasive and tough woody weeds such as Japanese Knotweed, hogweed and buddleia.

Pack coverage various MAPP No. 16182
1 ltr

ICL ProShield

Diflufenican and glyphosate.

A non-selective total herbicide for the control of a wide range of annual and perennial broad leaved weeds and grasses.

Pack coverage 11,000 sq.m MAPP No. 14767
5 ltr

Monsanto Roundup ProActive 360

Glyphosate.

A Non-irritant 360 g/ltr biograde total translocated herbicide.

Pack coverage 5,000 - 33,000 sq.m MAPP No. 17380
5 ltr

Monsanto Roundup ProVantage 480

Glyphosate.

High strength 480 g/ltr non-irritant total translocated glyphosate herbicide which controls both annual and perennial weeds.

Pack coverage 13,333 - 22,222 sq.m MAPP No. 15534
5 ltr

NoMix Dual CDA

Glyphosate and sulfosulfuron.h

A non-irritant, non-selective translocated, residual weedkiller for use through a NoMix Compact CDA lance.

Outer coverage 3,000 sq.m MAPP No. 13420
4 x 750 ml

NoMix Hilite CDA

Glyphosate.

A non-irritant, non-selective translocated, non-residual herbicide for use through a NoMix Compact CDA lance.

Outer coverage 3,000 sq.m MAPP No. 13871
4 x 750 ml

Use plant protection products safely. Always read the label and product information before use.

Hammer®

Fast acting total herbicide.

- Visible results in just 24 hours
- Combines 2 powerful active ingredients:
 - glyphosate
 - pyraflufen-ethyl
- Effective on a broad range of weeds
- Now with hard surface approval

Recommended Usage

- ✓ Horticultural
- ✓ Industrial
- ✓ Amenity
- ✓ Forestry

Where needs take us

Hammer® contains glyphosate and pyraflufen-ethyl. MAPP No. 16498. ®Registered Trade Mark of ICL Limited. Use plant protection products safely. Always read the label and product information before use.

For accurate weed control.

When you need accurate and reliable weed control, Barclay has the solution.

PROPYZ® delivers simple, efficient control of annual and perennial grasses, plus a wide range of broadleaved weeds. When long-term results are crucial, it's dependable.

What's more, its high-tech formulation promises excellent plant safety. Peace of mind when using it around trees and shrubs, reducing all that time-consuming and labour-intensive strimming and mowing.

But its adaptability for both pre- and post-emergence situations is what really marks it out from the crowd: PROPYZ® gives you a flexibility other amenity products can only dream about.

Demand results. Use PROPYZ®.

Ecoplug Max

Drill inserts to prevent
tree stump regrowth.

- Minimises root and stump sprouting
- 95 - 100% efficacy on treated stumps

Insecticides

Fargro DiPel DF

Bacillus thuringiensis.

A biological insecticide used for the control of caterpillars in ornamentals and amenity vegetation. Can be used to control brown tail moth in amenity situations. It is totally safe and kills the caterpillar with death occurring in a few days. It is essential to get good coverage with water rates of 400 - 1,000 litres per hectare. Application rate 750 g per hectare.

Pack coverage 6,666 sq.m

MAPP No. 11184

500 g

AgroPharm Pyrethrum 5EC

Pyrethrins (naturally occurring).

A broad spectrum contact insecticide suitable for edible and non-edible crops. It controls a wide range of pests including aphids, whitefly, thrips, caterpillars and leaf feeding insects.

Pack coverage various

MAPP No. 12685

1 ltr

Nippon Ant Killer Powder

Permethrin.

Highly effective control of common black ants and crawling insects.

Pack Coverage various

Pack 12 x 500 g

Nippon Wasp Nest Destroyer Foam

Permethrin and Tetramethrin.

Powerful spray aerosol that will destroy a wasp nest from a distance of up to 3 metres.

Pack coverage various

Pack 12 x 300 mls

Vitax Slug Gone

Wool Pellets

A natural organic way to keep slugs and snails away from plants.

Pack coverage various

Pack 10 lts

Mole Trap

The scissor mole trap is a poison free, fast and efficient mole control product. The trap has a strong spring action and is easy to set with a strong simple mechanism.

Each

Pest Controls

Rabbit Control

Grazers

A non pesticide trace element based spray which is safe to pets, wildlife and the environment. The effective easy solution to damage caused by grazing rabbits, pigeons, deer and geese. Lasts up to six weeks.

Pack coverage Amenity 2.5 acres

1 ltr

Pack coverage Agriculture 10 acres

Use plant protection products safely. Always read the label and product information before use.

HEALTHIEST. TURF. EVER.

Revolution Increases Plant Health

Revolution is a patented water management product with unique characteristics and the most widely tested plant health product in the world. It outperforms traditional soil surfactants, offering comprehensive water management and proven plant health benefits.

Plant Health Benefits:

- Increased production of key amino acids
- Improved root growth
- Increased chlorophyll production
- Increased drought and stress tolerance

Learn about Revolution's proven plant health benefits at www.farmura.com/healthrevolution

Liquid Wetting Agents

Aquatrols Aqueduct

This versatile multi use product offers quick, safe treatment for dry patch areas, and is totally compatible with Primer Select.

Pack coverage 400 sq.m

1 ltr

Pack coverage 4,000 sq.m

10 ltr

Aquatrols Dispatch Sprayable

New sprayable formulation which can be tank-mixed with other products. Patented technology gets water into fairways quicker and faster than any other penetrant products.

Pack coverage 57,143 sq.m

10 ltr

Aquatrols Fifty90

This new, safe, economic and proven product remains effective in the soil for up to 3 months. It reduces water repellency and promotes turf uniformity.

Pack coverage 2,000 sq.m

10 ltr

Aquatrols Primer Select

The classic, unique matrix flow soil surfactant, which encourages uniform high quality turf and does not burn.

Pack coverage 8,000 sq.m

10 ltr

Aquatrols Revolution

Unique technology that extends turf's natural antioxidant activity and significantly increases stress tolerance by balancing air to water ratios in the soil. Revolution must be applied on a monthly basis to achieve maximum efficacy.

Pack coverage 5,263 sq.m

10 ltr

ICL H2Pro AquaSmart

Specially formulated for use on fairways and outfield areas. It protects turf quality through periods of dry conditions and improves water use efficiency.

Pack coverage 10,000 sq.m

5 ltr

ICL H2Pro Dewsmart

Dewsmart is designed to prevent or reduce the formation of dew on the grass leaf. This is ideal for use as part of an ITM approach to help minimise the risk of disease outbreaks and improve surface quality.

Pack coverage 10,000 sq.m

10 ltr

ICL H2Pro FlowSmart

Helps surface water penetrate quickly providing a drier surface in wet conditions. Maximises the effectiveness of irrigation treatments and assisting with flushing of carbonates and salts from root zones.

Pack coverage 10,000 sq.m

10 ltr

ICL H2Pro TriSmart

A premium wetting agent that can be used monthly. Best applied before drought conditions arise it offers preventative and curative action against dry patch.

Pack coverage 5,000 sq.m

5 ltr

ICL Qualibra

The next generation wetting agent giving dynamic penetration with efficient water movement and distribution. Should be applied at four weekly intervals.

Pack coverage 5,000 sq.m

10 ltr

Prestige Super Infiltrate Liquid

Is a special blend of penetrants and wetting agents which remove excess moisture from the playing surface moving it down through the root zone. This produces a drier, firmer surface, helps with disease prevention and creates air channels within water logged pore spaces.

Pack coverage 10,000 sq.m

10 ltr

Prestige Super Fairway Liquid

Has three modes of action giving excellent wetting and water retention optimising penetration and lateral water movement in the root zone. Lasts up to 4 weeks and can be tank mixed with prestige super fairway plus iron.

Pack coverage 5,000 sq.m

10 ltr

Prestige Super Replenish Liquid Wetting Agent

A new "Tri-block copolymer formulation" liquid wetting agent featuring advanced surfactant technology formulation. This gives excellent wetting, optimising penetration and lateral water movement in the rootzone. Apply in early spring prior to dry patch symptoms then apply every 30 days for best results.

Pack coverage 5,000 sq.m

10 ltr

Vitax Clearing

An effective treatment specially designed for fairy ring control. Best used in late spring or early autumn when there is moisture and the fairy ring is active.

Pack coverage 625 sq.m

2.5 ltr

Vitax Early Start

A highly efficient dew dispersant which lasts for approximately three weeks. Used in the autumn and winter it is very effective in removing dew from the surface thus reducing the need to manually switch the greens surface.

Pack coverage 10,000 sq.m

2 ltr

Vitax Ultraflo Advance

A superior long term non-ionic wetting agent with a new and improved formulation which remains effective for longer and increases turf grass safety.

Pack coverage 2,000 - 4,000 sq.m

10 ltr

IT'S MORE THAN "JUST" A PENETRANT.

Put your water to work with Dispatch, a patented soil surfactant technology specifically designed for use on fairways. Dispatch reduces waste and maximizes irrigation efficiency, allowing you to save time, water, and energy.

Dispatch improves water movement into and throughout the soil profile, resulting in a healthier growing environment and more consistent playing surfaces. With two formulations available, Dispatch can easily be injected into your irrigation system or tank-mixed with any spray application.

Benefits of Dispatch:

- Promotes consistent playing surfaces for better playability
- Reduces water usage 25-50% without sacrificing turf quality
- Decreases runoff and leaching of water and other applied inputs

For more information, contact Farmura today!

Granular Wetting Agents

Aquatrols Primer Select SWDG Granular

Easily spreadable, water dispersible granular wetting agent.

Pack coverage 1,250 sq.m

22.5 kg

Aquatrols Revolution SWDG Granular

Easy to apply water dispersible granular with outstanding spreading characteristics.

Pack coverage 1,250 sq.m

22.5 kg

ICL H2Pro Conserve Granular

This granular product is free flowing and dust free, after application it releases the H2Pro and quickly breaks down. Best applied on a bimonthly application.

Pack coverage 500 sq.m

10 kg

Prestige Super Replenish Granular Wetting Agent

A new Tri-Block Copolymer formulation featuring advanced surfactant technology. Make the first application in early April and repeat approximately three months later. A single application will give a long lasting effect of up to 3 months.

Pack coverage 500 sq.m

15 kg

Pelleted Wetting Agents

Aquatrols Advantage Plus Pellets

Easy to use pellets featuring superior advantage plus formulation to improve hand watering.

Pack coverage various

Pack 6 pellets

Aquatrols Advantage Plus Pellets Plus Seaweed

Easy to use pellets featuring superior advantage plus formulation with high quality seaweed extract to stimulate root and healthy vigorous turf growth.

Pack coverage various

Pack 6 pellets

ICL H2Pro Conserve Tablet

A 100% active tablet containing H2Pro wetting agent for immediate relief of plant stress caused by hydrophobic soil conditions.

Pack coverage 6 x 500 sq.m

Pack 6 tablets

Indigrow OneShots

The oneshot range is a collection of concentrated products in easy-to-use no mess sachets. Oneshot products are fully tank mixable and can be used in combination with a full range of options available, see ad on page 70.

For further information on the complete Oneshot range ask your Collier Turf Care representative.

Pack coverage various

Pack 20 Sachets

Pelleted Wetting Agents

A severe dry patch problem

Prestige Super Replenish Concentrated BIG Tablet

A large 3 kg concentrated slowly soluble surfactant big tablet for use in irrigation storage tanks. Add a tablet to your irrigation tank and this will help combat dry patch as well as lubricating pop up sprinklers.

1 big tablet mixes with 2,500 litres of irrigation tank water

Pack 1 pellet

Prestige Super Replenish Hose End Pellets

Wetting and penetrating agent in easy to use tablet form. They are designed to be applied using an applicator gun, for the treatment of dry patch and water repellent soils in amenity turf. Apply via H2Pro applicator gun.

Pack coverage various

Pack 6 pellets

Wetting Agent Applicator Guns

Aquatrols Advantage Pellet Applicator Gun

A specially designed gun for applying Aquatrols Advantage C pellets.

Aquatrols Liquid Pro Applicator

A lightweight siphon mixing system that is ideal for applying Aqueduct liquid, a fantastic tool for touching up dry patch.

ICL H2Pro Applicator Gun

H2Pro tablets and Prestige Super hose end pellets can be applied through the new H2Pro applicator gun.

H2Pro / Prestige Applicator Gun

Spray Dye Indicators

Farmura Blue Spray Pattern Indicator

A high quality blue dye allowing the operator to apply the product both accurately and uniformly.

Mix 100 - 250 ml in 100 litres of spray solution

1 ltr

10 ltr

ICL ColourPro

Advanced spray pattern indicator to assist spraying and minimise spray drift.

Mix 1 - 2.5 litres in 1,000 litres of water

1 ltr

Optic SuperSeeker

This product will give you the longevity and colouration of both the heatseeker and greenseeker without tank mixing. Through the darker green colour on the turf surface more UV light is absorbed meaning a localised heating of the canopy by up to 2 degrees.

Pack coverage 5,000 - 10,000 sq.m

10 ltr

Prestige Super Blue Spray Dye

A unique blue water soluble spray designed to highlight sprayed areas, therefore reducing spray overlap or missed areas.

Mix 200 - 500 ml in 200 litres of spray solution

1 ltr

10 ltr

Prestige Super Green Spray Dye

A unique green water soluble spray designed to highlight sprayed areas, therefore reducing spray overlap or missed areas.

Mix 200 - 500 ml in 200 litres of spray solution

1 ltr

10 ltr

Aquatic Products

Barclay Gallup Biograde Amenity

Glyphosate.

A non irritant 360 g/ltr translocated glyphosate herbicide for the control of both aquatic emerged and floating weeds. This is the only chemical legally allowed for use in waterways but permission must be obtained from the environment agency.

Pack coverage various

MAPP No. 17674

5 ltr

ICL Black Onyx WSP

A water colourant that helps create the natural look of black water in lakes and ponds.

Pack coverage 3.2 hectare (5 sachets per hectare)

Box of 16 sachets

ICL Pro Crystal

A fast-acting aquatic algicide for use in static and slow moving water. It improves water clarity, controls swimming/floating unicellular and filamentous algae, hydrosoluble single dose sachets make application easy.

Application rate various

Bucket (9 x 454 g sachets)

Indigrow Upstream Black

A concentrated, easy to use aquatic colourant using natural, environmentally friendly black dyes, resulting in a natural looking water colour.

Pack coverage 2,000m³

1 ltr

Before using weedkillers in waterways you should consult the environment agency and must obtain their agreement before using the product.

Use plant protection products safely. Always read the label and product information before use.

Spray Dye Indicators

Spray dye indicators are an essential part of the spraying operation. Whether using a herbicide, fungicide, growth retardant, liquid fertilizer or iron product. It is essential that you apply the product both accurately and uniformly. Spray dyes help to indicate any missed or overlapped areas and will also identify blocked or damaged spray nozzles. Inaccurate spraying particularly with overlapping will increase the cost of chemicals and may also lead to scorch. Missing areas will mean that the pest, weed or disease will not be controlled.

Spraying Aids

All Clear Extra

A highly effective liquid cleaner to use after application of any amenity chemicals.

General cleaning mix 500 ml with 100 litres of water

5 ltr

Barclay Assist

Assist is a blend of water conditioning agents and acidifiers. It removes carbonates and bicarbonates and modifies pH of spray solutions.

Mix 62.5 ml with 25 litres of spray solution

Mix 250 ml with 100 litres of spray solution
(0.25% of total spray volume)

5 ltr

Barclay Stamina

Specially developed for the industrial vegetation and amenity contractors. Stamina is to be used where an improvement in the uptake and efficacy of approved three way selective turf herbicides is required.

Mix 150 ml with 100 litres of spray solution

3 ltr

ICL Phixer

Specialist sprayer water conditioner with a built-in pH colour indicator which turns pink when the water has achieved the ideal pH range.

Pack coverage various

5 ltr

ICL Spotless

Spray tank cleaning agent and general purpose cleaner.

Mix 250/500 ml with 100 litres of water

5 ltr

NoMix Universal Cleaner CDA

To clean NoMix CDA 700 series compact lances. Ready to use, quick and safe it keeps your NoMix lance clean and avoids blockages.

4 x 750 ml

Tank and Equipment Cleaner

A highly effective cleanser for use after application of any amenity chemicals. As well as being a general cleaner it can also be used to clean stubborn long term stains. Use to clean tanks, booms, hoses, filters and nozzles.

General cleaning mix 50 g with 50 litres of water

Stubborn cleaning mix 30 g with 10 litres of water

500 g

Trial Trax Boutmarker

Trial Trax Boutmarker is a 100% proprietary liquid blend of surfactants. It is a superior spray boutmarker and it produces a high quality, thick-bodied long lasting foam.

Mix 1 litre with 100 litres of spray solution

3 ltr

Prestige Super Penetrant

An organosilicone penetrant specifically designed for tank mixing with carbendazim and chlorpyrifos, it ensures the maximum penetration of the chemicals down in to the rootzone especially where a thatch layer is present.

Mix 25 ml with 25 litres of spray solution

Mix 100 - 200 ml with 200 litres of spray solution

1 ltr

Prestige Spraying Aids

Prestige Super pH Buffer

A water conditioner and buffering agent. It enhances the efficacy of chemicals particularly when the water pH is above 7.

Mix 62.5 ml with 25 litres of spray solution

Mix 250 ml with 100 litres of spray solution

1 ltr

Prestige Super Recovery (AdgiFe)

Is a registered adjuvant designed to be added to fungicides and herbicides to assist in the recovery of the grass.

- Fully tank mixable
- Contains amino acid, trace elements and surfactants
- Contains 2.4% ferric iron to provide a visual green up
- Green up masks the blackening of the weeds
- Surfactant contains a sticker and spreader
- Surfactant enhances efficiency of the iron
- Improves the mobility of nutrient products within the tank mix
- Improves rain fastness

Pack coverage 5,000 sq.m

AD No. A0797

5 ltr

Prestige Super Sticker

Super Sticker should be used where an improvement in the uptake and efficacy of approved three way selective turf herbicides is required. It ensures maximum effect at lower dose rates for the control of broadleaved weeds and makes the chemicals more rainfast as well.

Mix 35 ml with 25 litres of spray solution

Mix 150 ml with 100 litres of spray solution

1 ltr

Prestige Super Tank Cleaner

Tank cleaner is a specially formulated liquid which removes pesticides, deposits and other debris including oily substances from tanks, booms, hoses, filters and nozzles.

1 litre is sufficient to clean a 200 litre tank

5 ltr

Prestige Super Tank De-foamer

Use when necessary to reduce foaming in the spray tank, this should be done when the spray tank is at least half full and before foam overflows the tank chamber.

Use one squirt in 100 - 200 litres of spray solution

1 ltr

Sprayers & Spray Equipment

Turfguard Pro Plus Professional Sprayer

This unique, proven pedestrian sprayer now features a new tubular frame, ball bearing wheels and revised electrical charging point. This unique 25 litre electric sprayer with removable tank, battery and battery charger is now easier to assemble and maintain. The 3 nozzle boom comes complete with 2 sets of nozzles, and is suitable for professional users such as bowls clubs, cricket squares, golf and sports clubs.

Turfguard Spare Tanks

25 litre spare tank complete with fittings.

Turfguard Spare Nozzle Sets

Chemical Storage

Specialist Safety Equipment

If you require higher specification equipment than listed please ask us and we will be pleased to give you options and prices.

Chemical Storage Units

Transchem

For safe, secure transport of chemicals in cars, vans or any vehicle. Strong fibreglass construction with carrying handles.
20 ltr capacity

Chemsafe

With sufficient capacity to store 200 litres of liquid chemicals or 200 kg of granular pesticide. Manufactured from 2 mm steel with drain point secure lock and gas filled stays for assisted opening and closing.
200 ltr capacity

Transchem

ICL Fertilizer Spreaders

ICL Accupro 2000

A new improved rotary spreader with larger Turf Saver pneumatic wheels. Patented Helical Cone for a uniform, consistent spread pattern.

Rotary 25 kg capacity

ICL SR 2000

All features as Accupro 2000 plus new and improved larger diameter stainless steel frame. Positive on-off side deflector provides effective product delivery control.

Rotary 25 kg capacity

ICL SS2 Dropspreader

Stainless steel frame, hopper and fasteners provide outstanding durability and corrosion resistance. Now with larger Turf Saver pneumatic wheels for easier operator use.

Dropspreader 50 kg capacity

EV-N-SPRED FLEX-SELECT

With continual research and development, innovation and design EarthWay have become leaders in the pedestrian broadcast spreader market. The new revolutionary EarthWay Ev-n-Spred FLEX-SELECT range is engineered to provide a unique spreader experience enabling users to benefit from one spreader capable of spreading a wide range of materials accurately, economically and effectively.

Exclusive oscillating shut-off with replacable agitation pins improves poor flowing materials spread ability.

Intelligent design of the NEW delivery systems provides up to a 50% increase in the spreading width, making the FLEX-SELECT the most efficient spreader EarthWay have ever produced.

3 application options, 3 trays, one spreader for best results with all types of material. Standard-output for common granular materials and standard application rates - fertilisers. High-output for large particle size and high application rates - salt & ice melt. Low-output for small seed and very low application rates - grass seed and specialist chemical applications.

Ev-n-Spred Fertilizer Spreaders

Ev-n-Spred F80PD Professional

Professional high quality new flex-select options for golf courses, sports and football pitches. Has strong tubular professional frame with comfort handlebar. Comes complete with standard output fertilizer red 3-hole drop tray. (Optional high output sand & salt blue tray and optional low output grass seed black trays are available.)

Rotary 36 kg capacity

Ev-n-Spred F80D Commercial

Commercial high quality spreader with diamond chassis. New flex-select options for large gardens, sports and football pitches. Comes complete with standard output fertilizer red 3-hole drop tray. (Optional high output sand & salt blue tray and optional low output grass seed black trays are available.)

Rotary 36 kg capacity

Ev-n-Spred Blue High Output Sand & Salt Tray

Ev-n-Spred Black Low Output Grass Seed Tray

Ev-n-Spred 2040pi Salt Spreader

For spreading salt, this machine features a heavy duty strengthened gearbox with large pneumatic tyres and an extra large hopper.

Rotary 30 kg capacity

Ev-n-Spred 2600A Plus

Ideal for the smaller garden and even a small bowling green, this broadcast spreader has a medium sized plastic hopper, pneumatic wheels and a solid metal on/off linkage.

Rotary 18 kg capacity

Ev-n-Spred 2050P

Ideal for the larger garden this broadcast spreader has pneumatic tyres (can be used on rugged ground), commercial heavy duty gear box and will apply all granular fertilizers.

Rotary 36 kg capacity

Ev-n-Spred 2150

This semi professional broadcast spreader is ideal for use on a bowling green, it has large pneumatic tyres and an adjustable handle bar height. It has a large plastic hopper, heavy duty frame and precision rate control lever.

Rotary 23 kg capacity

Ev-n-Spred 2750

A handheld semi-professional spreader with shoulder strap. This hand cranked broadcast spreader is for those difficult areas where a wheeled machine cannot go.

Rotary 9 kg capacity

Ev-n-Spred M80ECM

The M80ECM is the largest 12v broadcast Ev-n-Spred spreader available today. With a 112 kg heavy duty, rust proof hopper and sturdy load bearing stainless steel chasis, this machine is designed to bolt to any vertical or horizontal surface.

OUTPUT**
(Fertiliser)

Features the EV-N-SPRED® 3 hole drop with the Dual Port Pro adjustable shut off system. Applies all granular fertilisers evenly. Saves time and money with one pass even application.

2
**HIGH
OUTPUT**
(Sand/Salt)

Designed for applying large granular materials e.g. rock salt. NEW exclusive oscillating agitator integrated into the shut off system. This improves the flow of difficult to spread materials.

3
**LOW
OUTPUT**
(Grass Seed)

Accurately apply small gauge materials such as fine grass seed, chemicals and other low volume output products.

DMMP 

Line Marking Liquids

Prestige Col-Mark Product Guide

The quality properties of the Prestige Col-Mark liquids allow fast, clean and easy dilution into clean water. Prestige Col-Mark Premium is also suitable for use on shale as well as many other surfaces. The quick drying properties enable the liquid to create a durable bright line that is rain resistant.

Prestige Col-Mark Premium

Premium grade line marking liquid offers excellent brightness and performance on a wide range of surfaces. Recommended rates are dilute up to 1 part paint and 9 parts clean water. This is depending upon pitch conditions or line requirements.

- Free-flowing formula
- Outstanding White performance
- Suitable for multi surface types
- Ideal for spray marker machines
- Excellence performance over several weeks

12.5 ltr drum

Prestige Col-Mark Sport

Col-Mark Sport grade has been designed for use when a balance has to be struck between performance and cost. Ideal for a weekly marking of sport pitches. The recommended rates are dilute up to 1 part paint and 6 parts clean water. This is depending upon pitch conditions or line requirements.

- Outstanding white marking product
- Cost effective performance
- Ideal for municipal owned pitches
- For use with spray markers
- Excellence weekly performance

12.5 ltr drum

Prestige Col-Mark Transfer

Col-Mark Transfer is the perfect compound for the traditional box/transfer wheel marker. Can be used neat or diluted up to 1 part paint and 3 parts clean water. This is depending upon pitch conditions or line requirements.

- Cost effective in use
- High whiteness achieved
- Adheres to grass leaf
- Box/transfer wheel marker use only
- For frequent applications

12.5 ltr drum

Aerosols

Topline Stadia Colours

Use on grass surfaces this paint can be used through both transfer wheel and spray machines. It is available in a variety of colours and can be used to create logos and advertising.

Blue, green, red and yellow 12.5 ltr

Permanent Marking Fluid

Paint for hard surface marking such as playgrounds and car parks. Prices on different colours available upon request.

Marking Chalk White

Traditional powder mixed with water for applying through a transfer wheel marker. Mix 2 kg per 1 ltr of water.

25 kg

Aerosols

These aerosols can be used inside or outside, on grass or hard surfaces of all types. They are designed to produce strong and lasting marks and lines with economy and safety. Aerosols are quick and easy to use and are usually touch dry within 15 - 30 mins.

Prestige Aerosols

White, yellow, red and blue

750 ml

Supaflush Topline

Supaflush is a specially formulated surfactant which greatly assists in the process of thoroughly cleaning and protecting the internal components on Topline spraying machines. Mix 50 ml with every 2 litres of water.

Supaturf®

The winning line-up

Setting the standard in linemarking

Proven at every level in sport - from international stadia to school sports pitches - Supaturf marking machines and liquids deliver the very best in line quality, visibility, brightness and longevity.

Whether you're marking out a Premiership pitch for a televised game, have responsibility for marking out multiple municipal pitches or look after a couple of junior soccer pitches, Supaturf has the perfect solution.

Artificial Surface Paint

Specially developed marking paint for use on all types of artificial surfaces. Produces professional quality, highly durable white lines. 12.5 litres

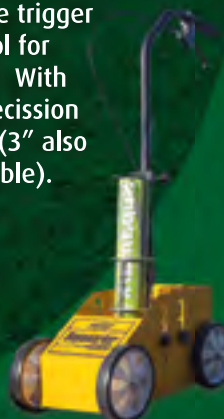

SupaMark Aerosols

Solvent-based, Xylene free, aerosol marking liquids. Use indoors or out, touch-dry in 15-20 minutes. Also available as **SupaMark Extra**, with added pigments for even brighter lines. 750ml

SupaMarker Pro

Enhanced design for easy and accurate marking of all kinds of hard surface. Simple trigger control for spray. With 2" precision plate (3" also available).

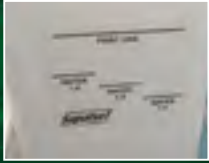

GUR 2 Wheel Applicator

Offers the perfect balance of ease of use and rugged construction. Designed to be used with SupaMark aerosols.

TFS25 (Tank Free System)

Tank free system complete with 2 x 12.5 litre drums, one having dilution marking and one for clean water to flush the system once finished. Robust, perfectly balanced and effortless to operate. Reduces waste, an easily flushed system. Simple to use marking guides can be adjusted from 50mm to 120mm.

TXE353 and TXE606

The battery powered TXE, already one of the world's most popular line markers, has been upgraded with a series of design enhancements which improve performance and operation still further. Available with a choice of battery packs, the TXE come as standard or with an integrated flush tank.

TXE606 - 18 amp/hr battery
TXE353 - 7 amp/hr battery

Accessories

Marking Disc

Ensures the sharpest lines. Just a few minutes to fit. Fully adjustable to change line widths.

Athletics Attachment

Produces three parallel lines in a single pass. Ideal for producing athletic track lines.

Spray Boom

Converts your line marking machine into an efficient power sprayer.

Marking Out Pins

Purpose-designed for line marking. Double-point to secure in wet soil. Tread bar to help penetrate firm ground.

Briteliner Arrow

The revolutionary transfer-wheel marking machine. Once set, the lighter, tougher Arrow will produce the same high quality line time after time. The ideal choice of machine when budgets are restricted but also the perfect tool creating stand-out lines for big games at major venues.

Range of wheel width options available:
50mm, 75mm, 100mm and 120mm.

Line Marking Equipment

Vitax Aerosol Applicators

These applicators are for use with the Prestige range of aerosols.

Aerosol GUR 2 wheeled applicator

Aerosol Supermarker Pro 4 wheel

BriteLiner Arrow

A completely re-designed and re-engineered transfer wheel line marker. Lighter, tougher, easier to use and clean this state of the art machine actually costs less than the previous version.

75 mm wheel 24 ltr capacity

100 mm wheel 24 ltr capacity

125 mm wheel 24 ltr capacity

The New TXE 353 and 606 Models

For many years, TXE line marking machines have been recognised as the industry standard. New for 2017, the TXE 353 and 606 machines offer even greater functionality and performance, combined with simplified maintenance and easier cleaning.

TXE353 Model

25 litre tank, 2 hour rechargeable battery (enough for approximately 6 pitches)

TXE353 Pro Model

Same as the 353, but complete with factory fitted 2.5 litre flush tank, with a back to tank system.

TXE606 Model

25 litre tank, 5 hour rechargeable battery (enough for approximately 15 pitches)

TXE606 Pro Model

Same as the 606, but complete with factory fitted 2.5 litre flush tank, with a back to tank system.

TFS25 (Tank Free System)

New TFS25 line marking machine is robust, efficient and effortless to operate. Comes with two drums, the first for marking liquid and second for clean water. This will flush the system once you have finished marking.

Topline TXE Flush Tank Kit Mk2

For TXE 252 and 505 models. This allows you to flush the paint filter, pump and spray nozzle with clean water without removing the paint.

Flush tank

Topline Marking Attachments

These attachments fit all the TXE line marking machines.

Front marker attachment

Athletic marker attachment

Spare parts are available for all the marking machines we sell, please ask for details.

Brass male connection 3/4 inch

Sprinkler Head Complete with Base

Metal sled base with brass sprinkler head complete with geka fittings. IR3633

Self Travelling Sprinklers

Pope Water Tractor

Single speed small garden model covers area approximately 30 m long x 10 m wide.

National Walking Model B3

Heavy duty 2 speed model for estates and parks covers 6 - 12 metres per hour, spraying width up to 15 m wide.

Perrot Roll Cart Travelling Sprinkler

The Perrot Roll Cart travels and irrigates on its own, used mainly for large sports fields, football pitches and large gardens. Travelling speed 10 - 20 metres per hour, with irrigation 120 m long x 28 - 36 m wide.

Hose Trolley (Heavy duty)

Carries up to 120 m x 19 mm or 80 m x 25 mm hose pipe, comes complete with quick couplings.

**Hose Trolley
(Heavy duty)**

COLLIER[®] TURF CARE

Dumpy Bags

CTC Tru-Turf Top Dressing

A very high quality screened and sterilised medium sand/Norfolk loam top dressing for bowling greens. This easily spreadable mixture has a pH of 7.0 (which is neutral). It is a kiln dried, sterilized free flowing top dressing that can easily be spread through a mechanical dresser.

Dumpy Bag

FTTD

POA

CTC Ornamental Bark

Is produced from pine and is typically sized between 8 and 35mm. It is suitable for decorative flower beds and borders, also suppressing weeds and aiding moisture retention.

Dumpy Bag

SOIL ORGS

POA

CTC Norfolk Fen Soil

A rich dark top soil with a low pH value (6 - 6.5). Screened and shredded the soils organic nature will help promote microbial activity and encourage root development.

Dumpy Bag

SOIL

POA

CTC Peat Free Compost

A 100% recycled, environmentally friendly peat free compost. This is a superb multi purpose compost ideal for improving the physical, chemical and biological characteristics of soil.

Dumpy Bag

COMP

POA

CTC Natural Turf Sports Sand

A moist sports sand for use on winter sports pitches.

Dumpy Bag

SAND

POA

CTC Woodchips

This is a cost effective pine based 5 - 40 mm woodchip for suppressing weed development and aiding moisture retention.

Dumpy Bag

SOIL ORGS

POA

All the above products are available in both dumpy bags and bulk deliveries, discounts are available based on number of bags or size of bulk delivery. The dumpy bag is sold based on approx. 1 tonne for sands, top dressings and soils and 750 litres for barks and composts.

Top Dressings and Composts

Bulk and Bagged Deliveries

Within our **existing trading area** we are able to offer a wide range with prices quoted against specification, quantity and delivery point.

• Bark products	A complete range including play grade, ornamental and woodchips.
• Fine turf top dressings	Varieties of sands, fen and other soils.
• Economy dressings	For tees, aprons and fairways.
• Pathway aggregates	Redgra and other options available
• Rootzone mixes	Any mix as specified for construction work.
• Soils	Screened, sterilised or unsterilised, or as dug.
• Sedge and sphagnum peats	Various grades including Shamrock Irish peat for USPGA spec. greens.
• Dried sands and bunker sands	Various grades and colours.
• Cricket wicket dressings	A selection with varying clay content.
• Tennis court dressings	For grass and hard courts.
• Specialist sports surfaces	For top dressings, surface work and construction base materials.
• Cockle shells	High quality from East Anglia's beaches.
• Sands	Various grades and qualities for soil amelioration, golf bunkers, top dressings.

CTC Tru-Turf For Bowls and Golf

A very high quality screened and sterilised medium sand/Norfolk loam top dressing for bowling greens. This easily spreadable mixture has a pH of 7.0 (which is neutral).

25 kg

Kettering Loam For Tennis

Kettering loam 3 mm sterilised.

25 kg

Cricket Wicket Dressings

A comprehensive range of both sterilised and unsterilised clay content dressings. All clay contents are approximate and may vary slightly from that shown.

County No. 1	(32% clay)	sterilised	25 kg
Club No. 2	(30% clay)	sterilised	25 kg
Kaloam	(31% clay)	unsterilised	25 kg
Ongar Loam	(31% clay)	unsterilised	25 kg
Ongar Loam Plus	(30% clay)	unsterilised	25 kg
Super Surrey Loam	(28% clay)	unsterilised	25 kg

Sands

Astro Turf sand type 2EW

25 kg

Humax Multipurpose Compost	75 ltr
Humax Potting Basket and Tub Compost	75 ltr
Humax John Innes Seed	25 ltr
Humax John Innes No.2	25 ltr

TPMC Tree Planting Compost Professional

A peat based planting compost with added NPK fertilizers and special additive giving long life wettability.

75 ltr

Ornamental Bark

A high quality bagged ornamental spruce bark mulch
5 - 35 ml size

70 ltr

Bulk loads of both TPMC and Bark are available subject to load size, delivery address and haulage charges.

**Quantity bagged discount prices are available on all top dressings and compost products.
Please contact your local Collier technical representative for prices.**

Landscaping Products

Germination Aids

Tildenet Grow Sheet

Heavy duty black germination cover with webbing and grommets. Life expectancy 10 years plus.

3.66 m x 5.00 m (cricket ends) each
3.66 m x 23.00 m (wicket length) each

Tildenet Grow Sheet

Economy black germination cover. Life expectancy 7 years plus.

3.66 m wide x 25 m each
3.66 m wide x 100 m each

Tildenet Economy Germination Sheet

White economy germination sheet with life expectancy 2 - 3 years.

4 m wide x 250 m each
8.5 m wide x 250 m each

Weed Control

Plantex

Plantex from DuPont has a unique porous structure, allowing air, water and nutrients to pass through to the plant roots whilst preventing weed growth.

Landscape roll 2 m x 50 m each

Covertex Ground Cover

Covertex has a unique porous structure, allowing air, water and nutrients to pass through to the plant roots whilst preventing weed growth.

Landscape roll 1 m x 100 m each
Landscape roll 3.05 m x 100 m each
Landscape roll 5.15 m x 100 m each

Greenstakes Fixing Pegs

Flexible organic green ground stakes which are 100% biodegradable.

4" stake pack of 500
6" stake pack of 500

Vitax Fixing Pegs

Complete with eyelets. Pack of 12

Wheelbarrows

Wheelbarrow

130 litre polypan steel frame wheelbarrow.
130 ltr capacity

Tree Ties

Rainbow 600 mm Buckle Tree Ties

Pack of 100 C203

Rainbow 600 mm Spiral Tree Guards

Pack of 250 C282

Landscaping Fertilizers

ICL Sierrablen Flora

Controlled release fertilizer for trees and shrubs in granular and tablet form.

ICL Landscaper Pro Tablets

Tablet 15 g x 467 15:9:9 + 3% MgO

7 kg bucket

ICL Sierrablen Flora (Enmag)

11:22:9 + 6% Mg.

This CRF slow release fertilizer for tree and shrub planting lasts approximately eight to nine months and can be used at any time during the growing season.

25 kg

Planting Aids

Tree Stakes

Creosote treated tree stake 1.8 m x 50/75 mm
Creosote treated tree stake 2.4 m x 50/75 mm

Galvanised Rabbit Netting

600 mm x 31 m x 50 m (BS)
1050 mm x 31 m x 50 m (BS)

Railway Sleepers

New Oak Sleepers

Available in either brown or green these are treated with CCA preservative which conforms to the latest regulations. Each sleeper weighs approx. 65 kg.

Length 2.44 m x width 200 mm x depth 100 mm

Reclaimed Sleepers

We can offer used, reclaimed hardwood railway sleepers, which are not impregnated with tar. Each sleeper weighs approx. 70 kg.

Length 2.59 m x width 250 mm x depth 150 mm

On both of these types of railway sleepers we can only guarantee two flat sides. Sizes of sleepers are subject to small changes depending on supplier. Please check before ordering.

Sleeper Grips

Tough, durable polyester resin sheets which are bonded and screwed down onto sleepers. This creates a safe, non slip surface.

Length 600 mm x width 150 mm x depth 4 mm

Salt Products

Ice Ban (Liquid Salt)

A fast acting liquid de-icer which is an environmentally friendly and non-corrosive alternative to salt.

Pack coverage 550 sq.m
10 ltr

Salt Bin

Yellow heavy duty impact resistant salt bin.
Large Heavy Duty 400 ltr capacity

Polyshovel 18"

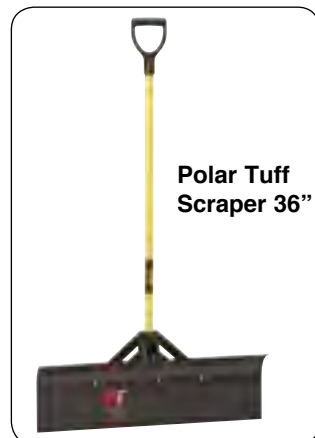

18" poly shovel with wooden handle

Polar Tuff Scraper 36"

36" scraper with fibreglass handle

Polar Tuff Plough 39"

Bi-directional snow plough simple and easy to use.

Penguin Snoboss

A specially designed ergonomic snow shovel with a 19.5" wide head

Salt Granular (Broste De-icing) White

Non-staining white rock salt which is for use on car parks, footpaths, walkways, tee mats and driveways.

Application rate various

25 kg

Grit Salt

A traditional 50% brown rock salt mixed with 50% grit which is for use on roads, footpaths, driveways and car parks.

Application rate various

20 kg

Drainage Products

Rainbow Rite Pavé Landscape

The most cost effective and simple installed pathway/car parking for general landscaping use. Made from 100% recycled UK materials and designed for strength. It is totally porous, will retain soil, grass and gravel without washout.

Size: 50 cm x 50 cm (56 m2 per pallet)

Drainage Pipes

A full range of drainage pipes and accessories is available, prices on request

Polybed Sports Pitch/Golf Course Drainage

The installation of a sub-surface drainage system is imperative to ensure the longevity of sports fields and golf courses. Sports fields generally require a greater concentration of sub-surface drainage pipe, installed at shallow depths. Golf course fairways, bunkers and greens also require intensive irrigation and drainage.

Polyagg 3 m x 300 mm dia. FD1230
lightweight fill

Polybed 3 m x 300 mm dia. FD1231G
geotex wrapped with drainage pipe

Linking Collar FD 1206

Verde Teeturf

Is an artificial grass designed for teeing areas that allows the golfer to drive from any preferred position. This construction is superior to all other designs, allowing sand and rubber crumb to be brushed into the pile with absolutely minimal effort.

For more information on Verde Teeturf and other artificial grasses, please contact one of our technical representatives.

Indigrow OneShots

The easy-to-use no mess sachets

The OneShot range is a collection of concentrated products in easy-to-use, no mess sachets.

These exceptionally environmentally friendly products offer a vast reduction in packaging waste and transport costs and emissions.

All of the OneShot products are fully tank mixable, and can be used in any combination. They can be used to enhance any tank mix with a full range of options available. Because the OneShot products are highly concentrated, they offer the turf manager a very cost effective method of adding wetting agent, macro or micro nutrients or other additives to any spray mix.

For further information on the complete Indigrow range please visit www.indigrow.com

Overview

Impact Humik OneShot A fully soluble Humic acid complex, containing both Humic and Fulvic acids. **Turbine Reaction OneShot** A plant biostimulant and stress relieving agent. **Solar Pro-Active OneShot** A high phosphate true foliar feed. **Fusion Tracer OneShot** Soluble trace element package including micronutrients. **Compass Bio-Active OneShot** A plant stimulant and soil conditioner in the form of a pure seaweed, fully soluble powder. **Magnum Forty Four OneShot** A highly concentrated penetrant wetting agent for use on hydrophobic soils. **Optik Blue OneShot** An enhanced spray pattern dye which fades rapidly after 24-48 hrs. **Optik Isolator OneShot** Complexed acidifiers to reduce pH and hydrolysis.

110PJ01	Orange	0.33
110PJ015	Green	0.49
110PJ02	Yellow	0.66
110PJ025	Lilac	0.82
110PJ03	Blue	0.98
110PJ04	Red (Turfguard nozzle)	1.31
110PJ05	Brown	1.63
110PJ06	Grey	1.96

How to calculate NPK nutrient input

Use the following formula to convert to kg per hectare

Application rate (in g / sq.m) x % nutrient content of fertilizer applied ÷ 10

so for an application of Prestige 12:0:9 spring summer standard
at 35 g per sq.m

35 x 12 ÷ 10 = 42 kg/ha. N

35 x 9 ÷ 10 = 31.5 kg/ha. K₂O

TERMS & CONDITIONS

1. INTERPRETATION

1.1 Definitions. In these Conditions, the following definitions apply:
"Business Day" a day (other than a Saturday, Sunday or public holiday) when banks in London are open for business.
"Conditions" the terms and conditions set out in this document.
"Contract" the contract between the Company and the Customer for the sale and purchase of the Goods in accordance with these Conditions.
"Customer" the person or firm who purchases the Goods from the Company. "Force Majeure Event" has the meaning given in clause 9.
"Goods" the goods (or any part of them) set out in the Order.
"Order" the Customer's order for the Goods, as set out the Customer's purchase order, the Customer's written acceptance of the Company's quotation, or overleaf, or as notified to the Company by email, telephone, fax or post as the case may be.
"Specification" any tailored specification for Goods that is agreed in writing by the Customer and the Company.

1.2 If you are dealing with the Company as a consumer no restrictions or limitations in these terms affect your legal rights in relation to Goods that are faulty or not as described. Advice about your legal rights is available from your local Citizens' Advice Bureau or Trading Standards office.

2. BASIS OF CONTRACT

2.1 These Conditions govern all transactions between the Customer and the Company or any division of it except as otherwise specifically agreed in writing by the Company.
2.2 The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification submitted by the Customer are complete and accurate.
2.3 Orders are accepted subject to stock availability. The Company reserve the right to suspend in part or full or cancel any Contract at any time should it not be able to fulfil the Contract. The Company shall use its best endeavours to notify the Customer within 14 days of receipt of an Order if it intends to reject or suspend the Order or any part of it.
2.4 Any samples, drawings, descriptive matter, or advertising produced by the Company and any descriptions or illustrations contained in the Company's catalogues or brochures are produced for the sole purpose of giving an approximate idea of the Goods described in them. They shall not form part of the Contract or have any contractual force.
2.5 A quotation for the Goods given by the Company shall not constitute an offer. A quotation shall only be valid for a period of one month from its date of issue. Quotations may be subject to alteration if there is any increase in the manufacturer's price.

3. DELIVERY

3.1 Delivery of the Goods shall be completed on the Goods' arrival at the Delivery Location. Delivery will be deemed to have occurred if it has been left by the delivery personnel in accordance with the instructions of the Customer. It is the responsibility of the Customer to ensure such location is secure and weatherproof.
3.2 Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence.
3.3 The Company shall not be liable for any delay or failure in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide the Company with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods. If the Company fails to deliver the Goods, its liability shall be limited to the costs and expenses incurred by the Customer in obtaining replacement goods of similar description and quality in the cheapest market available, less the price of the Goods.
3.4 Kerbside deliveries only where no vehicular access exists, unless otherwise arranged with the Company prior to delivery. Bulk deliveries will be made to hard standing only, unless otherwise arranged prior to delivery at the Customer's risk and cost.
3.5 If delivery vehicles are required or requested to leave the public highway on to the property of the Customer to effect delivery then this is at the Customer's risk and cost.
3.6 Collection of Goods from the Company's warehouse can be made with prior arrangement. Identification documentation will be required to collect.
3.7 If Goods have not been received within 7 Business Days from the date of invoice the Company must be notified immediately in writing (otherwise no responsibility can be accepted).

4. QUALITY

4.1 In the event that the Goods are received damaged or have been delivered incorrectly this must be reported to the carrier immediately and to the Company in writing within 48 hours of delivery. Goods signed "not checked" or "unexamined" or similar will be regarded as having been given a clear signature. It is the responsibility of the Customer to check the Goods have been delivered correctly at the time of delivery and shall have no responsibility for wrongly delivered Goods unless it is notified to the Company within 48 hours of delivery.
4.2 It is the responsibility of the user to check the correct Goods have been delivered prior to use or application, and no responsibility will be accepted by the Company for wrongly delivered Goods once they have been opened or used.
4.3 Any advice, recommendations or programs provided by the Company for the use or application of any Goods are provided in good faith but are recommendations only and it is the responsibility of the Customer to read all labels and instructions provided with the Goods and to take professional advice and ask the Company for specific advice relating to the Goods if it has any queries as to the correct product to apply or the application process which should be followed. The Company accepts no responsibility for any loss as a result of any misapplication of any Goods. Responsibility for the application is with the Customer, who should comply with all statutory requirements and recommendations when dealing with the Goods.

5. RETURNS

5.1 No Goods will be exchanged or refunded unless they are in of inadequate quality in accordance with the full terms and conditions of the Company with the prior consent of the Company. The Company reserve the right to apply a minimum 20% handling charge on the price of any returned or exchanged Goods. Goods must be returned in their original condition.
5.2 Goods for return or exchange must be returned to the Company's place of business (or as directed by the Company) at the Customer's cost. If the Company collects or arranges collection of the Goods for return at the request of the Customer then the Company may invoice the Customer for all carriage costs. These charges do not apply where there is a justifiable complaint against the quality of the Goods and in which case any costs of return will be refunded by the Company.
5.3 Special Order Items For the avoidance of doubt, the Company will not offer any exchange or refund in respect of any Special Order Items (which are items produced specifically to customer's requirements and/or items not listed in our Product and Price Guide) unless such Special Order Items are defective.

6. TITLE AND RISK

6.1 The risk in the Goods shall pass to the Customer on completion of delivery.
Title to the Goods shall not pass to the Customer until the Company has received payment in full (in cash or cleared funds) for: a) the Goods; and b) any other goods or services that the Company has supplied to the Customer in respect of which payment has become due.
Until title to the Goods has passed to the Customer, the Customer shall: a) hold the Goods on a trustee basis as the Company's bailee; b) store the Goods separately from all other goods held by the Customer so that they remain readily identifiable as the Company's property; c) not remove, deface or obscure any identifying mark or packaging on or relating to the Goods; d) maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery; e) notify the Company immediately if it becomes subject to any insolvency event listed in the full terms and conditions; and f) give the Company such information relating to the Goods as the Company may require from time to time but the Customer may resell or use the Goods in the ordinary course of its business.

7. PRICE AND PAYMENT

7.1 The price of the Goods shall be the price set out in the Company's published price list in force as at the date of delivery. It is the Company's intention to maintain the prices in its catalogue for as long as possible, but the Company reserves the right to change its prices without prior notice. It is the responsibility of the Customer to enquire when placing an Order. Bulk (invoiced at weighbridge weight) supplies and large orders may be subject to special quotation upon request. Special offers and discounts may be applied from time to time at the discretion of the Company.
7.2 Orders of £250 and over (exclusive of VAT) include standard delivery costs within the United Kingdom except for items marked with * in the catalogue, which are subject to the extra carriage charges which will be notified to the Customer upon enquiry. A surcharge is made on carriage of football and rugby posts and other large items to destinations in Devon, Cornwall, Wales and Scotland and all destinations outside mainland U.K. Additional delivery charges may apply to the Scottish Highlands, islands and other remote areas or destinations outside mainland U.K., which will be advised upon notification of the delivery address by the Customer. Next Day delivery may be arranged at additional cost upon enquiry.
7.3 Orders below £250 will incur a surcharge of £20.00 (exclusive of VAT) due to administrative, handling and carriage costs. Orders placed on the website below £250 (exclusive of VAT) will not incur a surcharge, but will be charged carriage based on the weight and size of the items ordered. See website for more information.
7.4 Trade accounts (as notified to the Customer and marked as TD) will be charged delivery at cost or as quoted at the time of Order.
7.5 The price of the Goods is exclusive of amounts in respect of value added tax (VAT), unless stated otherwise. The Customer shall, on receipt of a valid VAT invoice from the Company, pay to the Company such additional amounts in respect of VAT as are chargeable on the supply of the Goods where applicable. (Please note grass seed is zero rated)
7.6 The Company may invoice the Customer for the Goods on or at any time after dispatch of the Goods. The Company will send additional monthly statements to its account customers.

7.7 The Customer shall pay the invoices on the following terms:

- 7.7.1 New Accounts and Approved Accounts without Credit Terms - payment with Order;
- 7.7.2 Approved Accounts with Credit Terms – Payment in full and in cleared funds within 21 days of despatch of Goods unless other credit terms agreed in writing with the Company.
- 7.7.3 Payment can be made by cheque, bank transfer or using most debit or credit cards (not including American Express or Diners Club). Payments by credit card will incur a surcharge of up to 3% of the total price (incl VAT). Time of payment is of the essence.
- 7.7.4 BACS payments should be made to Natwest Bank PLC, Sort Code: 53-61-38, Account No: 66503469.

8. LIMITATION OF LIABILITY - THE CUSTOMER'S ATTENTION IS DRAWN TO THIS CLAUSE

8.1 Nothing in these Conditions shall limit or exclude the Company's liability for death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable), fraud or fraudulent misrepresentation, breach of the terms implied by section 12 of the Sale of Goods Act 1979, defective products under the Consumer Protection Act 1987; or any matter in respect of which it would be unlawful for the Company to exclude or restrict liability.
8.2 Subject to clause 8.1:
8.2.1 the Company shall under no circumstances whatever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the Contract in excess of the sum of £10,000; and
8.2.2 the Company's total liability to the Customer in respect of all other losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed £100,000.

9. FORCE MAJEURE

Neither party shall be liable for any failure or delay in performing its obligations under the Contract to the extent that such failure or delay is caused by a Force Majeure Event. A Force Majeure Event means any event beyond a party's reasonable control, which by its nature could not have been foreseen, or, if it could have been foreseen, was unavoidable, including strikes, lock-outs or other industrial disputes (whether involving its own workforce or a third party's), failure of energy sources or transport network, acts of God, war, terrorism, riot, civil commotion, interference by civil or military authorities, national or international calamity, armed conflict, malicious damage, breakdown of plant or machinery, nuclear, chemical or biological contamination, sonic boom, explosions, collapse of building structures, fires, floods, storms, earthquakes, loss at sea, epidemics or similar events, natural disasters or extreme adverse weather conditions, or default of Company's subcontractors.
