

Handy Green II Hand-Held Broadcast Spreader

Spreader Details:

Quick Start Instructions:

1. Fill hopper with seed, fertiliser or granulars.
2. Reach hand through ergonomic wrist rest to grasp trigger.
3. Adjust orange rate adjuster to correct setting based on the product being applied. (See chart at right)
4. To apply product, begin walking at a steady pace, then squeeze and hold trigger with left hand whilst turning crank with right.
5. When finished, sweep any stray particles from hard surfaces back onto lawn area.

Applying Prestige Fertiliser

1. Set spreader setting to **5**. At average walking pace this will apply 35 g/sq.m when covered in two direction. (17.5 g/sq.m in each direction). By applying in two directions you will achieve an even coverage and reduce the chance of missing any areas.
2. Check the on / off trigger is working efficiently.
3. Measure 1 kg of fertiliser and pour into spreader. DO NOT fill the spreader to the top as makes turning the handle very difficult. 1 kg @ 35g will cover 29 sq.m approx.

Example: To cover 100 sq.m you will need 3.5 fill ups of 1 kg (spreading in 2 directions). As a guide, on a measuring jug 1 kg of fertiliser (1000g) is approx. to 1 litre (1000 ml).

Directions for Use

SPREADER SETTINGS

Seed	1	Light
	2	
Fertiliser	3	Moderate
	4	
Ice Melt/Fertiliser	5	Heavy

To increase application rate, adjust spreader setting to a higher number.

Application rates may vary depending on crank and walking speed.

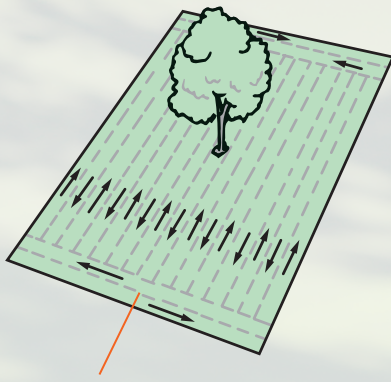

Handy Green II Hand-Held Broadcast Spreader

Application Tips

For Rectangular Lawns:

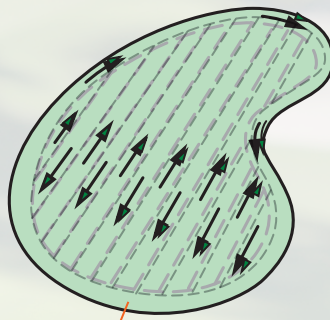

Apply two header strips across each end for a turning area, then apply back and forth in the longest direction.

Header Strip

For Irregular-Shaped Lawns:

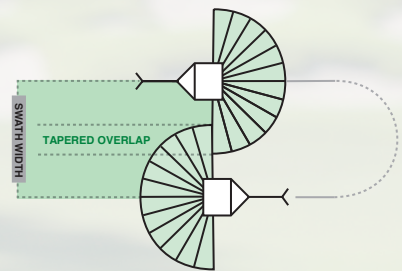

Apply one header strip around the entire lawn for a turning area, then apply back and forth.

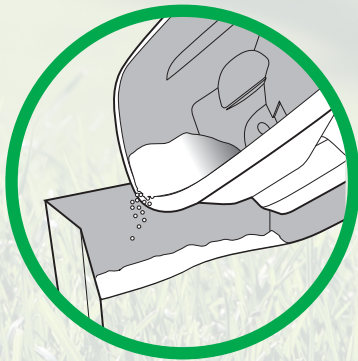

Header Strip

Spreader Overlap:

To avoid streaks or misses, overlap spreader patterns approximately 1-1/2 feet (50cm). Do not leave spreader open when making turns.

Clean Up

Never leave unused product in the spreader. Pour leftover material back into the package and seal the package tightly.

Clean up any overage on hard surfaces. If product lands on any hard surface such as a driveway, path or road, sweep the product back onto the lawn to keep it from being washed into drains and ultimately surface waters.

Clean spreader after use to maintain proper operation. Perform cleaning over lawn. Do not allow product and/or rinse water to enter drains
