KEY BENEFITS

Promotes balanced hydration

Unlocks existing bound nutritional elements

Delivers consistent results

AquaVita Technology is a platform of proprietary technologies, resulting from an advanced bio-extraction process and designed to aid turf care professionals in optimising turf health. Each adaptation of the AquaVita™ Technology is specifically developed and paired with a unique blend of proven soil surfactant chemistry to address the specific needs of the targeted turf area.

The proven soil surfactants in Zipline break surface tension and optimise the moisture deep down into the soil profile. Once in place, the AquaVita™ Technology helps to maximise turf quality by enhancing the availability and retention of both applied and existing nutritional elements.

The AquaVita mineral solution bio-extract promotes nutrient assimilation in the soil, while the soil is hydrated with a combination of linear and etherified block copolymer surfactants suspending those nutrients which nurture the plant.

Zipline ProFacts

WHAT IT DOES:	Zipline powered by AquaVita Technology improves water infiltration from the surface through the rootzone and aids soil enhancement by unlocking existing bound nutritional elements
HOW TO APPLY:	<ul style="list-style-type: none"> • Apply Zipline through conventional spray equipment in a minimum of 190L of water per hectare • Apply monthly • For best results apply before next scheduled irrigation cycle
COVERAGE:	Fairways: Apply 6.5 to 19L per hectare Greens: Apply 19 to 25.5L per hectare
WHERE TO USE:	Safe to use on all turf types
