The undiluted product must not be applied directly to turf.

READ ALL OTHER SAFETY PRECAUTIONS & DIRECTIONS FOR USE BEFORE USED

OMEX**Ferromex
Mosskiller Concentrate****MAPP 16896**

A herbicide for professional use in managed amenity turf.
A soluble concentrate formulation containing 16.4%
Iron Sulphate with 4.6% w/w Nitrogen.

20 Litres**DIRECTIONS FOR USE:****RESTRICTIONS/WARNINGS:**

Avoid walking on treated areas until dry.
If spilt on paving, concrete etc wash off immediately to avoid discolouration.

MIXING AND SPRAYING:**Mixing**

Gently invert the container once or twice before pouring into spray tank. Add water to the required volume.

APPLICATION:

Apply 150 litres of Ferromex Mosskiller Concentrate in a total spray volume of at least 650 litres per hectare. (i.e. 150 litres product + 500 litres water).

Do not use Ferromex Mosskiller Concentrate undiluted.

Ferromex Mosskiller Concentrate can be applied in any type of sprayer calibrated to apply sprays at a volume of between 650 and 850 litres per hectare.

It is most effective when applied to actively growing turf in moist conditions from early spring to early autumn.

Do not use in drought, freezing conditions or when rain is imminent.

Apply 3 days after and 4 days before mowing on a still day.

Do not exceed the recommended dose.

Rake out dead moss when it has turned black, usually 7-14 days after treatment.

Re-treatment may be necessary for heavy moss infestation, or if moss returns.

Do not apply more than 3 times per year.

SPRAY QUALITY:

Use a **COARSE SPRAY** as defined by **BCPC (NOZZLE SELECTION HANDBOOK)**.

Avoid drift onto neighbouring areas as iron sulphate containing products can cause damage to susceptible crops and/or discolouration to hard surfaces.
