## DIRECTIONS FOR USE

50-50 SOLUBLE IRON is a fast acting soluble formulation for the rapid greening and toughening of grass; ideal before major tournaments or when a high class appearance is essential.

Regularly used, 50-50 SOLUBLE IRON will help acidify soil.

## TIMING

Treat turf during Spring, Summer or Autumn when the soil is moist but no rain is expected.

## APPLICATION

Apply as a coarse spray (BCPC Definition) using a hand held, pedestrian controlled or vehicle mounted sprayer fitted with 80° or 110° flat fan or deflector (anvil) type nozzles at the rates given in the table.

	ha	500m <sup>2</sup>	100m <sup>2</sup>
50-50 SOLUBLE IRON	25kg	1.25kg	250g
Water	900 litres	45 litres	9 litres

## MIXING INSTRUCTIONS

Put into the spray tank half of the water required. Pre-mix the correct amount of 50-50 SOLUBLE IRON with a suitable volume of water before adding to the water in the spray tank. Rinse the mixing vessel with water and add the rinsings to the spray tank. Make up the required volume with more water, secure the cover or lid of the spray tank and agitate thoroughly.

Pre-mixing is not necessary for sprayers fitted with agitators. Half fill the tank with water and ensure efficient agitation before gradually adding each pack of 50-50 SOLUBLE IRON. Make up the required volume and agitate thoroughly.

When spraying has been completed, thoroughly rinse out the machine using clean water.

## NOTE

Avoid accidental spillage onto clothing, paths or other hard surfaces as staining may occur.

## HARMFUL IF SWALLOWED PRECAUTIONS

Avoid contact with skin and eyes.

Keep out of reach of children.

Keep away from food, drink and animal feeding stuffs.

If swallowed, seek medical advice immediately and show this container or label.

Iron(fe) soluble in water 19.5%  
Sulphur trioxide (SO<sup>3</sup>) 28% (S 11%)

To be used only where there is a recognised need  
Do not exceed the appropriate application rates
