ADJ A0797

Application Rate: Adjife should be used at an application rate of 10 litres per Ha in a water volume of 300-600 litres per Ha.

Mixing and Spraying: Before use ensure that all spraying equipment is clean.

- Add half the required volume of water into spray tank and start agitation
- Add the selective herbicide /fungicide and agitate
- Add the Adjife and add the remainder of water. Continuous agitation must be maintained until spraying is complete.
- It is recommended Prestige Super Tank Cleaner be used after spraying application is complete.

Adjife is a soluble concentrate adjuvant containing 345 g/L Ferric Ammonium Citrate, 300 g/L alcohol polyglucoside and 104.5 g/L ethylene oxide propylene oxide copolymers.

Directions for Use:

Adjife is an adjuvant specifically formulated for use with herbicides and fungicides on amenity grassland, vegetation and managed amenity turf to improve wetting and uptake.

**ALWAYS FOLLOW THE STATUTORY CONDITIONS OF USE OF THE
HERBICIDE / FUNGICIDE.**
