Weedol®

LAWN WEEDKILLER

Weedol® Lawn Weedkiller kills many weeds in lawns with **one treatment**, including the problem weeds such as white clover, black medick, lesser trefoil, daisy, dandelion, plantain and common mouse-ear.

Instructions for use:

FOR USE ONLY AS A HOME GARDEN WEEDKILLER.

Maximum individual dose: 15ml product per 10 sq m.
Maximum number of treatments: One per year.

Read all safety instructions before use

When to use

Use on weeds, which are leafy and actively growing - usually from April to September. For best results do not mow for 3 days before or after treatment. Avoid spraying in drought or frost. New lawns: treat in the spring at least 2 months after sowing or laying turf. The new lawn must be growing well.

Where to use

For use on lawns.

How to use

SHAKE WELL BEFORE USE AND USE MIXTURE IMMEDIATELY.
Measure 15 millilitres and add to 5.0 litres of water in a watering can fitted with a fine rose (or 1.0 litre of water in a sprayer). The mixture should be applied evenly over 10 square metres of lawn. Direct away from ponds and other surface water bodies.

CAUTION

Avoid spray coming into contact with cultivated plants.
Wash out the sprayer or watering can thoroughly after use.
After treatment, leave the clippings from the first mowing on the lawn. The next three mowings should be composted well, for at least 9 months, before being used as a mulch.
Do not dispose of grass clippings via council composting schemes.
