## Conserve Tablets

### Product description

Everris H<sub>2</sub>Pro Tablet is a wetting and water conservation agent for use in treating dry patch (localized dry spot) and reducing the irrigation requirement of soils. The product has both a preventative and curative effect on dry patch by reducing the number of wet/dry cycles in the soil preventing the hardening of water repellent deposits.

### Product advantages

1. Significantly reduces irrigation requirements.
2. Unique curative and preventative action against Dry Patch (localized Dry Spot).
3. Effective through the rootzone and not just at the surface.
4. Excellent spreading and penetration characteristics.
5. Can be used to spot treat problem areas to complement main wetting agent programme.

### Technology

Poly-S	Pace	TMax	Mu <sub>2</sub>	Silk	Pro-Lite	3D

### Use

Green	Tee	Fairway	Sportsfield	Amenity

### Recommended period for use

J	F	M	A	M	J	J	A	S	O	N	D
---	---	---	---	---	---	---	---	---	---	---	---

### Performance\*

Dispersal: immediate  
Turf response: 7 days  
Longevity: spot treat as required  
\* depending on environmental factors

### Product characteristics

Pack size: 6 x 250g tablets  
Pack coverage: 6 x 500m<sup>2</sup>  
Item code: 03040199AA

### Directions for use

- Use tablets for spot treating hydrophobic areas in combination with full wetting agent programme.
- Use tablets in H<sub>2</sub>Pro Tablet applicator gun.
- Watering-in after application will aid penetration of wetting agent into the soil and improve efficacy.
- Penetration of the wetting agent will be further enhanced if applied following aeration programmes such as hollow tining, slitting and/or scarification.

### Storage

Keep away from heat and sources of ignition. Keep away from food, drink and animal feeding stuffs. For quality reasons: Keep out of reach of direct sunlight, store under dry conditions, partly used bags should be closed well. Keep at temperatures between 0°C and 40°C.

### Health and safety

A Material Safety Data Sheet is available on request.
