EAST ANGLIA'S LEADING SUPPLIER & ADVISOR TO THE SPORTS AND AMENITY TRADE

Grass Seed and Clover

Safety Data Sheet

1. Grass seed is not classified as a hazardous material.
2. The seed that is supplied by Barenbrug UK Ltd is not treated with any pesticide that is listed in the Control of Pesticides Regulations 1986. It is illegal to use any pesticide not officially approved.
3. The seed may contain levels of dust. It is therefore necessary to carry out a risk assessment before commencing work with the seed.
4. A full COSHH assessment should be carried out to determine the level of dust in the working atmosphere and relevant personal protective equipment used. If possible the source of dust should be eliminated at its source.
5. It is recommended that at least a dust mask conforming to EN149:2001 or higher should be used. Ideally dust extraction equipment should be installed.
6. It is also recommended that, where grass seed comes into physical contact with the skin, suitable gloves should be worn.
7. Dust may also cause eye irritation and suitable precautions should be taken to prevent this occurring.

If you require further information please contact me.
