

# Frontline Compact

Sustainable Herbicide Solutions  
with total droplet control

## How does the Frontline Compact work?

The Frontline Compact is a unique Total Droplet Control (TDC) hand-held, low volume herbicide application system, combining pre-mixed, highly effective herbicides with easy to use, efficient applicators.

The ready-to-use herbicides are supplied in 750ml cartridges, which connect directly to the applicator and eliminate the need for mixing or measuring. The 'click and go' herbicide cartridge makes the Frontline Compact an ideal solution to weed control where smaller volumes are required.

Re-chargeable batteries give up to 35 hours spraying time per charge, increasing productivity by reducing downtime.

## Why use a Frontline Compact?

### Highly effective herbicides

- unique formulations penetrate the leaf and start working quickly to enhance rain-fastness

### Increased productivity with no errors

- no time spent mixing, measuring or refilling knapsacks

### Reduced risk

- simple calibration process, safe and quick preparation

### Reduced environmental impact

- targeted application technology virtually eliminates spray drift, droplet bounce and run-off

### Safe for bystanders, residents and pets

- low volume formulations and no breathable droplets

### Easy to use

- TDC herbicide cartridge connects directly to the end of the lightweight handset

### Versatile

- flexible disc system, delivering a complete range of accurate spray widths

Obstacles

Shrub beds

Tree bases

Industrial areas

Hard surfaces

## TDC Herbicides

Nomix Enviro offers a complete range of TDC herbicides for use in all amenity areas.

Our TDC herbicides reduce the volume of herbicide being applied, whilst remaining extremely effective. The technologically advanced formulations help the droplet stick to the leaf and penetrate the waxy surface. This helps the herbicide to start working quickly, enhancing rain-fastness.

Nomix TDC herbicides are non-hazardous to operators, wildlife and pets, making them a safer solution to weed control.

TDC Herbicide	Mode of Action	Advantage	Application Rate(s)*
Nomix Dual	Residual	Up to 6 months control	9 litres/ha
Hilite	Total	Rain-fast within 30 - 60 minutes of application	7.5 - 10 litres/ha
Conqueror†	Total	Aquatic Approval	7.5 - 15 litres/ha
Tribute Plus	Selective	No damage to grass at recommended rates	5 - 8 litres/ha

\* For full information and application rates, always refer to the product label.

† Conqueror does not have approval for use in Republic of Ireland.

Nomix Dual contains 162g/l (16.8% w/w) isopropylamine salt of glyphosate (equivalent to 120g/l glyphosate) plus 2.22g/l (0.23% w/w) sulfosulfuron.

Hilite contains 194g/l (20.1% w/w) isopropylamine salt of glyphosate (equivalent to 144g/l glyphosate)

Tribute Plus contains 252g/l MCPA as sodium and potassium salts. 18g/l dicamba (as sodium salts) and 42g/l mecoprop-p (as potassium salt).

Conqueror contains 194g/l (17.9% w/w) isopropylamine salt of glyphosate (equivalent to 144g/l glyphosate).

For aquatic use of Conqueror, users must consult the appropriate water regulatory body (Environment Agency/Scottish Environment Protection Agency), before using this product near water and must obtain agreement before using this product to control aquatic weeds.

Conqueror does not have approval for use in Republic of Ireland.

For full information on applications, weed spectrum, rates and equipment refer to the product label.
