

<b>MO BACTER</b>	Organic Lawn Fertiliser & Moss Killer	2 x 20 kg	100 g/sq.m
<b>UNIVERSAL</b>	Lawn Feed	20 kg	50 g/sq.m
<b>RECOVERY</b>	Organic Lawn Fertiliser	20 kg	50 g/sq.m
<b>BIO-Lime</b>	Organic Lawn Fertiliser	20 kg	50 g/sq.m

## March - April

Apply **Mo Bacter** Organic Lawn Fertiliser and Moss Killer.

Mo Bacter contains healthy bacteria which eats thatch and dead moss in your lawn which will eliminate the need to rake or scarify.

## May - June

Apply **Universal** Lawn feed to give approx. 12 weeks longevity.

This fertiliser is perfect for ensuring your lawn is healthy and green throughout the growing season, giving you the perfect lawn for you to enjoy.

## Aug - Sept

Apply **Recovery** Organic Lawn fertiliser.

Recovery is ideal for use in areas of high grass stress like drought, flooding or hard wear and will give your lawn a strong colour throughout the cooler Autumn months.

This is a good time to overseed tired lawns with a seed such as **Barenbrug Green Velvet 'The All Rounder' Grass Seed**. This is a great multi-purpose grass seed suitable for most lawns, where a nice consistent grass seed is required.

## Oct - Jan

Apply an application of **Bio-Lime** Organic Fertiliser. Slow release to give 8 - 12 weeks longevity. Bio-Lime is ideal for use in the Autumn and Winter for combating low pH issues in your lawn. It also contains magnesium which creates a green healthy sward and helps maintain the health of your lawn throughout the autumn and winter months.
