

SEATURF SPECIAL 12-0-6

A combined seaweed extract and liquid fertiliser for use on sports and amenity turf, providing a rapid uptake of plant nutrient while the natural liquid seaweed extract will stimulate the soil biomass and root development, release locked up soil nutrients and improve drought and disease resistance.

DIRECTIONS FOR USE

Apply at the rate of 66 l/ha (6 gal/acre) at 6 to 8 week intervals in spring and summer. SEATURF SPECIAL 12 0 6 will provide a rapid green up from foliar and root uptake of the nutrient while the seaweed extract boosts root development.

SITUATION	FREQUENCY	100 m ²	500 m ²	Ha	120 sq yd	600 sq yd	Acre
As a maintenance spray	6-8 week intervals	660 ml	3.3 lts	66 ltr	24 fl oz	6 pints	6 gal
WATER	-	3-9 ltr	15-45 ltr	300-900 ltr	5-16 lints	3-10 gal	25-80 gal

MIXING INSTRUCTIONS

Put into the spray tank half of the water required. Measure the correct amount of concentrate and add to the water in the spray tank. Rinse out the measure and add the rinsings to the spray tank. Make up to the required volume with more water. Secure the cover or lid of the spray tank and agitate thoroughly. When spraying has been completed rinse out the equipment using clean water.

COMPOUND FLUID FERTILISER 12-0-6

Total Nitrogen (N) 12% w/w
Total Potassium (K₂O) 6.0% w/w

Agitate Contents before use, store out of direct sunlight, between 0 and 30°C
