

Nippon Wasp Nest Destroyer Foam provides the rapid knockdown of tetramethrin and the killing power of permethrin in a specially designed powerful spray aerosol allowing the treatment of wasp nests from a safe 3 metre (10 ft) distance. The spray foams up instantly to thoroughly wet the treated nest.

DIRECTIONS FOR USE

Spray in the early morning or late evening when wasps are in the nest. Hold can upright approximately 3 metres (10 ft) from the nest and spray an 8 second burst to thoroughly wet the nest. Pay particular attention to the nest entrance or where the wasps are seen entering or leaving. Do not stand directly beneath nest. Consider wearing suitable protective clothing where there is significant wasp activity.

For larger nests spray a 12 second burst. A repeat application may be necessary, particularly where the nest entrance is not accessible.

If spraying outdoors do not spray directly into the wind.

NOTE: Do not use in confined spaces. On painted surfaces test a small area for discoloration before carrying out overall application.

STATUTORY CONDITIONS RELATING TO USE FOR AMATEUR USE

FOR USE ONLY AS AN INSECTICIDE

Application rate: Spray from a distance of 3 metres. 50cm diameter nest, 8 second burst, 80cm diameter nest, 12 second burst

Do not breathe spray mist

Avoid contact with skin

SPRAY ONLY ONTO SURFACES

COVER FOOD, FOOD PREPARING EQUIPMENT AND EATING UTENSILS before application.
