

Proshield®

Pre and post-emergent non-selective herbicide

ProShield is a non-selective herbicide for control of annual and perennial weeds on natural surfaces not intended to bear vegetation and permeable surfaces overlaying soil.

Benefits

- Residual barrier prevention against weed germination
- Rainfast within 1 hour
- For use on gravel and soft surfaces

Characteristics

Formulation type: **Liquid (SC)**
Technology: **Total herbicide (residual)**
Pack size: **5 litre**
Pack coverage: **11,000m²**
MAPP No: **17525**
PCS No: **Not available in ROI**
Contains: **250g/L glyphosate and 40g/L diflufenican**

Areas of use

Industrial ✓
Amenity ✓

Application information

Application rate: **4.5L/ha**
Water rate: **200-400 L/ha**
Maximum no of treatments: **1 per year (at latest end of September)**

Recommended period of use
